

sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for BVPS-1 dated July 1973.

Agencies and Persons Consulted

On January 24, 2002, the staff consulted with the Pennsylvania State official, Mr. L. Ryan, of the Pennsylvania Department of Environmental Protection Bureau, Division of Nuclear Safety, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated June 29, 2001, as supplemented by letters dated October 4 and December 1, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR

Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland this 11th day of February 2002.

For the Nuclear Regulatory Commission.

Daniel Collins,

Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-361 and 50-362]

Southern California Edison Company, San Diego Gas and Electric Company, The City of Riverside, California, The City of Anaheim, California, San Onofre Nuclear Generating Station, Units 2 and 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of amendments to Facility Operating License Nos. NPF-10 and NPF-15, issued to Southern California Edison Company, et al. (the licensee), for operation of the San Onofre Nuclear Generating Station (SONGS), Units 2 and 3, located in San Diego County, California. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of Proposed Action

The proposed action would amend the Facility Operating Licenses (FOLs) for SONGS, Units 2 and 3, to delete license conditions that have been fulfilled and to make other administrative and editorial changes.

The proposed action is in accordance with the licensee's application dated March 21, 2001, as supplemented by letter dated January 11, 2002.

The Need for the Proposed Action

When the FOLs, NPF-10 and NPF-15, were issued to the licensee, the NRC staff deemed certain issues essential to safety and/or essential to meeting certain regulatory interests. These issues were imposed as license conditions in the FOLs upon their issuance and during subsequent operation of the plant, with deadlines for their implementation. Since the units were licensed to operate in the 1980s, most of these license conditions have been

fulfilled. For the license conditions that have been fulfilled, the licensee proposed to have them deleted from the FOLs. The licensee also proposed to make changes to the license to reflect the deletion of the completed license conditions.

The proposed amendments involve administrative changes to the FOLs only. No actual plant equipment, regulatory requirements, operating practices, or analyses are affected by these proposed amendments.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that there will be no significant environmental impact if the amendments are granted. No changes will be made to the design and licensing bases, and applicable procedures at SONGS, Units 2 and 3 will remain the same. Other than the administrative changes, no other changes will be made to the FOLs, including the Technical Specifications.

The proposed actions will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not affect nonradiological plant effluents and has no other environmental impacts. Accordingly, the NRC concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

Since the NRC has concluded that there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the NRC staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources different than those

resources previously considered in the Final Environmental Statement related to the SONGS Nuclear Generating Station.

Agencies and Persons Contacted

In accordance with its stated policy, on January 25, 2002, the NRC staff consulted with the California State official, Mr. Steve Hsu, of the Radiologic Health Branch of the State Department of Health Services, regarding the environmental impact of the proposed actions. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed actions will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed actions.

For further details with respect to the proposed action, see the licensee's letter dated March 21, 2001, as supplemented by letter dated January 11, 2002. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland.

Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdrc@nrc.gov.

Dated at Rockville, Maryland, this 11th day of February 2002.

Applications for Licenses To Import/Export Class A Radioactive Mixed Waste

Pursuant to 10 CFR 110.70(b)(4) and (c) "Public notice of receipt of an

application", please take notice that the U.S. Nuclear Regulatory Commission has received the following applications for licenses to import and export Class A radioactive mixed waste. Copies of the applications are available electronically through ADAMS and can be accessed through the Public Electronic Reading Room (PERR) link, <http://www.nrc.gov/NRC/ADAMS/index.html>, at the NRC Homepage.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555; and the Executive Secretary, U.S. Department of State, Washington, DC 20520.

The information concerning the applications follows.

NRC IMPORT LICENSE APPLICATION AND NRC EXPORT LICENSE APPLICATION

Name of applicant, date of applicant, date received, application number	Description of material			Country of origin
	Material type	Total qty	End use	
Diversified Scientific Services January 18, 2002 January 22, 2002 IW012	Class A radioactive mixed waste in various forms including semi-solids, solids, and liquids..	15,000,000 kg containing 2000 curies tritium, carbon-14, & mixed fission product radionuclides and other contaminants..	For thermal destruction & return to Canada..	Canada.
Diversified Scientific Services January 18, 2002 January 22, 2002 XW008	Class A radioactive mixed waste in the form of baghouse salts and ash; and, if necessary, return of any non-conforming Class A radioactive mixed waste..	15,000 liters containing 30 curies tritium, carbon-14, & mixed fission product radionuclides and other contaminants. Quantity includes non-conforming waste, to be returned as required..	Return of waste after processing. Return of non-conforming waste..	Canada.

For the U.S. Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 12th day of February 2002.

Janice Dunn Lee,
Director, Office of International Programs.

NUCLEAR REGULATORY COMMISSION

Call for Identification of Proposed Anticipatory Research Projects

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for comments.

SUMMARY: The Nuclear Regulatory Commission's Office of Nuclear Regulatory Research is seeking recommendations for anticipatory research from all stakeholders that will

help the agency prepare for the challenges and regulatory issues it may face in the future. A Call for Identification of Proposed Anticipatory Research Projects is presented below. Please provide comments to Dr. James W. Johnson, Special Assistant to the Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by e-mail to jwj@nrc.gov by June 1, 2002.
