

comments on how to make this proposed rule easier to understand, including answers to questions such as the following: (1) Are the requirements in the proposed rule clearly stated? (2) Does the proposed rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the proposed rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (A "section" appears in bold type and is preceded by the symbol "\$" and a numbered heading; for example, § 46.3 Information Collection) (5) Is the description of the rule in the **SUPPLEMENTARY INFORMATION** section of the preamble helpful in understanding the proposed rule? What else could we do to make the rule easier to understand? Send a copy of any comments that concern how we could make this rule easier to understand to: Office of Regulatory Affairs, Department of the Interior, Room 7229, 1849 C Street NW., Washington, DC 20240. You may also e-mail the comments to this address: *Exsec@ios.doi.gov*

List of Subjects in 25 CFR Part 46

Indians—education, adult education.

Dated: March 7, 2002.

Neal A. McCaleb,

Assistant Secretary—Indian Affairs.

For the reasons set out in the preamble, Part 46 of Title 25 of the Code of Federal Regulations is amended as follows:

PART 46—ADULT EDUCATION PROGRAM

1. The authority citation for part 46 continues to read as follows:

Authority: 43 U.S.C. 1457; 25 U.S.C. 2, 9, 13.

2. Section 46.3 is revised to read as follows:

§ 46.3 Information collection.

Information collection requirements contained in this part have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned control number 1076–0120. This information is being collected to assess the need for adult education programs. The information collection is used to manage program resources and for fiscal accountability and appropriate direct services documentation. Response to this request is necessary to obtain or retain a benefit. Public reporting burden for this form is estimated to average 4 hours per response including time for reviewing

instructions, gathering, maintaining data, completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to the BIA Information Collection Clearance Officer, 1849 C Street NW., Washington, DC 20240.

[FR Doc. 02–7000 Filed 3–22–02; 8:45 am]

BILLING CODE 4310–6W–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD07–02–021]

Drawbridge Operation Regulations: Hatchett Creek (US 41), Gulf Intracoastal Waterway, Venice, Sarasota County, FL

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Seventh Coast Guard District, has approved a deviation from the regulations governing the operation of the new Hatchett Creek (US 41) bridge across the Gulf Intracoastal Waterway in Venice, Florida. This deviation allows the drawbridge owner to only open one leaf of the bridge from March 18, 2002, until May 15, 2002, to complete construction of the new bascule leaves. A double leaf opening is available with 6 hours notice to bridge tender.

DATES: This rule is effective from 12:01 a.m. on March 18, 2002, until 11:59 p.m. on May 15, 2002.

ADDRESSES: Comments and material received from the public, as well as comments indicated in this preamble as being available in the docket, are part of docket [CGD07–02–021] and are available for inspection or copying at Commander (obr), Seventh Coast Guard District, 909 SE. 1st Avenue, Room 432, Miami, FL 33131 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Barry Dragon, Chief, Operations Section, Seventh Coast Guard District, Bridge Branch at (305) 415–6743.

SUPPLEMENTARY INFORMATION: The Florida Department of Transportation requested that the Coast Guard temporarily allow the Hatchett Creek bridge to only open a single leaf of the bridge from March 18, 2002, until May 15, 2002. Double leaf openings will be available with 6 hour advance notice to the bridge tender. This temporary

deviation from the existing bridge regulations is necessary to complete construction of the new bascule leaves. The Hatchett Creek (US 41), bridge has a horizontal clearance of 45 feet between the fender and the down span.

The District Commander has granted a temporary deviation from the operating requirements listed in 33 CFR 117.5 to allow the owner to complete construction of the new bascule leaves. Under this deviation, the Hatchett Creek (US 41) bridge need only open a single leaf of the bridge from March 18, 2002, until May 15, 2002. Double leaf openings will be available with a 6 hour advanced notice to the bridge tender.

Dated: March 13, 2002.

Greg Shapley,

Chief, Bridge Administration, Seventh Coast Guard District.

BILLING CODE 4910–15–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MO 152–1152a; FRL–7163–2]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is announcing it is approving the State Implementation Plan (SIP) revision submitted by the state of Missouri which provides for the attainment and maintenance of the sulfur dioxide (SO₂) National Ambient Air Quality Standard (NAAQS) in Springfield (Greene County), Missouri. This revision approves a Consent Agreement which requires SO₂ emission reductions from a major air emissions source in Springfield. Approval of this SIP revision will make the Consent Agreement Federally enforceable.

DATES: This direct final rule will be effective May 24, 2002, unless EPA receives adverse comments by April 24, 2002. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Comments may be mailed to Wayne Kaiser, Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101.

Copies of documents relative to this action are available for public

inspection during normal business hours at the above-listed Region 7 location. The interested persons wanting to examine these documents should make an appointment with the office at least 24 hours in advance.

FOR FURTHER INFORMATION CONTACT: Wayne Kaiser at (913) 551-7603.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This section provides additional information by addressing the following questions:

What is a SIP?

What is the Federal approval process for a SIP?

What does Federal approval of a state regulation or control strategy mean to me?

What is the NAAQS for SO₂?

What NAAQS exceedances occurred in Springfield, Missouri?

What is the control strategy?

What is contained in the SIP submittal?

Have the requirements for approval of a SIP revision been met?

What action is EPA taking?

What Is a SIP?

Section 110 of the Clean Air Act (CAA) requires states to develop air pollution regulations and control strategies to ensure that state air quality meets the national ambient air quality standards established by EPA. These ambient standards are established under section 109 of the CAA, and they currently address six criteria pollutants. These pollutants are: carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each Federally-approved SIP protects air quality primarily by addressing air pollution at its point of origin. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

What Is the Federal Approval Process for a SIP?

In order for state regulations and control strategies to be incorporated into the Federally-enforceable SIP, states must formally adopt them consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state regulation or control strategy is adopted, the state submits it to us for inclusion into the SIP. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are

received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 110 of the CAA are incorporated into the Federally-approved SIP. Records of such SIP actions are maintained in the Code of Federal Regulations (CFR) at Title 40, Part 52, entitled “Approval and Promulgation of Implementation Plans.” The Missouri SIP is published in 40 CFR part 52, subpart AA.

The actual state regulations and control strategies which are approved are not reproduced in their entirety in the CFR outright but are “incorporated by reference,” which means that we have approved a given state regulation or control strategy with a specific effective date.

What Does Federal Approval of a State Regulation or Control Strategy Mean to Me?

Enforcement of the state regulation or control strategy before and after it is incorporated into the Federally-approved SIP is primarily a state responsibility. However, after the regulation is Federally approved, we are authorized to take enforcement action against violators. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What Is the NAAQS for SO₂?

As mentioned above, we have established ambient air quality standards for a number of pollutants, including SO₂. These standards are set at levels to protect public health and welfare. The standards are published in 40 CFR part 50. If ambient air monitors measure violations of the standard, states are required to identify the cause of the problem and to take measures which will bring the area back within the level of the standard. The 24-hour standard for SO₂ is 0.14 parts per million, not to be exceeded more than once per year. There is also a 3-hour and an annual standard.

What NAAQS Exceedances Occurred in Springfield, Missouri?

In 1996, there were two exceedances of the 24-hour SO₂ standard at separate monitors in the vicinity of the James River power station. The source of the SO₂ emissions identified as contributing to the exceedances of the NAAQS was the Springfield, Missouri, City Utilities James River power generating station. There are five boilers at this facility.

What Is the Control Strategy?

The Missouri Department of Natural Resources (MDNR) negotiated enforceable emission limitations and other control measures, means, and techniques, as well as schedules and timetables for compliance, sufficient to ensure that the NAAQS for SO₂ will be achieved and maintained in the future. These measures incorporate the use of low sulfur coal and fuel blending. Compliance will be determined through coal sampling and fuel certification, and continuous emissions monitoring.

The control strategy reduces the allowable SO₂ that can be emitted to the atmosphere on a 24-hour average from the five boiler units. Units 1-4 are limited to 1.5 lb/mmBtu of heat input and Unit 5 is limited to 2.0 lb/mmBtu of heat input. The pre-existing limit was 9.2 lb/mmBtu. Two additional SO₂ monitors will be installed in the vicinity of the James River station, for a total of five monitors.

These control strategy requirements were incorporated into a Consent Agreement issued by MDNR to City Utilities. In addition to the conditions above, the Consent Agreement contains monitoring, reporting, and recordkeeping requirements sufficient to determine compliance. These provisions shall also be incorporated into the facility's Title V operating permit.

What Is Contained in the SIP Submittal?

The MDNR submitted a request to us to approve the Consent Agreement as a revision to the Missouri SIP. Additional information is contained in the state submittal and in the EPA Technical Support Document (TSD) for this notice which can be obtained by contacting us at the address above.

Have the Requirements for Approval of a SIP Revision Been Met?

The state submittal has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submittal also satisfied the completeness criteria of 40 CFR part 51, appendix V. In addition, as explained above and in more detail in the TSD, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

What Action Is EPA Taking?

We are approving a revision to the Missouri SIP which requires source-specific SO₂ emission reductions which will result in attainment and maintenance of the SO₂ NAAQS in Springfield (Greene County), Missouri.

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a “significant regulatory action” and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely

approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This rule also is not subject to Executive Order 13045 “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 804 exempts from section 801 the following types of rules: (1) Rules of particular applicability; (2) rules relating to agency management or personnel; and (3) rules of agency organization, procedure, or practice that do not substantially affect the rights or obligations of non-agency parties. (5 U.S.C. 804(3).) EPA is not required to submit a rule report

regarding this action under section 801 because this is a rule of particular applicability.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 24, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects 40 CFR Part 52

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52**

[MO 114-1114b; FRL-7162-9]

Approval and Promulgation of Implementation Plans; State of Missouri**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: EPA is approving as an amendment to the Missouri State Implementation Plan (SIP) a revision to the Missouri construction permit rule. EPA is also responding to comments received during the public comment period. This revision will strengthen the SIP with respect to attainment and maintenance of established air quality standards, ensure consistency between the state and Federally-approved rules, and ensure Federal enforceability of the state's air program rule revisions pursuant to section 110 of the Clean Air Act.

EFFECTIVE DATE: This rule is effective on April 24, 2002.

FOR FURTHER INFORMATION CONTACT: Wayne Kaiser at (913) 551-7603.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This section provides additional information by addressing the following questions:

- What is a SIP?
- What is the Federal approval process for a SIP?
- What does Federal approval of a state regulation mean to me?
- What is being addressed in this document?
- Have the requirements for approval of a SIP revision been met?
- What action is EPA taking?

What Is a SIP?

Section 110 of the Clean Air Act (CAA) requires states to develop air pollution regulations and control strategies to ensure that state air quality meets the national ambient air quality standards established by EPA. These ambient standards are established under section 109 of the CAA, and they currently address six criteria pollutants. These pollutants are: carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each state must submit these regulations and control strategies to us

for approval and incorporation into the Federally-enforceable SIP.

Each Federally-approved SIP protects air quality primarily by addressing air pollution at its point of origin. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

What Is the Federal Approval Process for a SIP?

In order for state regulations to be incorporated into the Federally-enforceable SIP, states must formally adopt the regulations and control strategies consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state submits it to us for inclusion into the SIP. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 110 of the CAA are incorporated into the Federally-approved SIP. Records of such SIP actions are maintained in the Code of Federal Regulations (CFR) at Title 40, part 52, entitled "Approval and Promulgation of Implementation Plans." The actual state regulations which are approved are not reproduced in their entirety in the CFR outright but are "incorporated by reference," which means that we have approved a given state regulation with a specific effective date.

What Does Federal Approval of a State Regulation Mean to Me?

Enforcement of the state regulation before and after it is incorporated into the Federally-approved SIP is primarily a state responsibility. However, after the regulation is Federally approved, we are authorized to take enforcement action against violators. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What Is Being Addressed in This Document?*Background*

On April 6, 2001, we published a proposal and a direct final **Federal**

Register document to approve Missouri rule 10 CSR 10-6.060, Construction Permits Required, as a revision to the Missouri State Implementation Plan (SIP). Among other revisions, this submission established minimum emission cutoffs for the state's minor new source review (NSR) program. In general, Missouri did not previously have exemptions to its minor NSR program based on emission levels. The revisions, in relevant part, exempt sources with emission levels below 0.5 pounds per hour or 876 pounds per year of a regulated pollutant from the minor source permitting program. Because adverse comments were submitted on our approval of the rule, the direct final rule was withdrawn on June 1, 2001 (66 FR 29705).

Two comment letters were received—one from the Associated Industries of Missouri (AIM) and one from the Regulatory Environmental Group For Missouri (REGFORM). The REGFORM comments were received two days after the close of the comment period, but since its comments were similar to those submitted by AIM, they will also be addressed here.

Response to Comments

Comment 1: The AIM comment was general in nature and pertained to the portion of the rule relating to the emission levels below which permit review for new construction or modification is not required. AIM stated that this issue had been the subject of discussion of a work group involving industry, citizen groups and the Missouri Department of Natural Resources (MDNR), which led up to the revision of the rule, and the work group is again meeting and the "insignificant levels" issue is again being reviewed. Since the rule may be revised again, AIM believes it is inappropriate to incorporate the rule in the SIP at this time. The comments from REGFORM also concerned the "insignificant levels." REGFORM commented that the aforementioned work group was again meeting and that we should not approve this revision, but instead wait until a new rule is promulgated after the work group has completed its deliberations.

Response to Comment 1: The CAA contains two limitations relating to EPA action on SIP submittals which are relevant to the comment. First, section 110(k)(2) provides, in part, that EPA must act on a SIP submission within 12 months after EPA determines that the SIP submission is "complete." Second, section 110(k)(3) provides that we must approve a SIP revision which meets the requirements of the CAA.
