

method such as a randomized, controlled study or experimental research, or a demonstration trial?

Answer: No, the proposal does not require that you use scientific method to demonstrate the efficacy of a specific approach. You should provide rationale for using a specific approach, including any past results you may have from using the approach. You should include the health outcomes you expect in the target community as a result of the proposed approach.

Question 14: If we have additional support for this program through other sources, can they be used? (Related to Ranking Criteria 9 and 10)

Answer: Yes, it is fine if you include additional resources you may have for the project.

II. What Action is the Agency Taking?

A. Background

EPA is publishing this notice in response to registrants' requests to cancel three pesticide products containing chlorpyrifos-methyl. (See the

table below for specific information regarding the cancellation requests).

Reregistration Eligibility Decision (RED) documents summarize the findings of EPA's reregistration process for individual chemical cases, and reflect the Agency's decision on risk assessment and risk management for uses of individual pesticides. Chlorpyrifos-methyl belongs to a group of pesticides known as organophosphates (OPs). EPA has issued a Report on FQPA Tolerance Reassessment Progress and Risk Management Decision (TRED) assessing the risks of exposure from chlorpyrifos-methyl. EPA will also consider the cumulative risks from all organophosphates, as they all share a common mechanism of toxicity affecting the nervous system by inhibiting cholinesterase.

In letters received by EPA on January 31, 2001 and February 13, 2001, the registrants of products containing chlorpyrifos-methyl agreed to several voluntary measures to cancel all products with this active ingredient. The registrants are requesting cancellation of these products after

determining that they would not be generating or submitting data required by EPA under section 3(c)(2)(B) of FIFRA to support continued registration of chlorpyrifos methyl products.

As part of the Agreement, the signatory, and non-signatory registrants, among other things, agreed to cancel their manufacturing use product (EPA Reg. No. 62719-42) and the liquid formulations (EPA Reg. No. 7501-41 and 62719-43) and will not sell nor distribute the products after December 31, 2003. All sales, distribution, and use of existing stocks of the manufacturing use product and liquid formulations will be allowed until December 31, 2004.

EPA will consider any comments received within 180 days of publication of this notice in the **Federal Register** prior to cancelling affected uses.

B. Request for Voluntary Cancellation of Manufacturing Use, and Liquid Formulation Products

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more

pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary termination of any minor agricultural use before granting the request, unless: (1) The registrants request a waiver of the comment period, or (2) the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment. EPA anticipates granting the cancellation request shortly after considering the comments received during the 30-day comment period for this notice.

Pursuant to section 6(f)(1)(A) of FIFRA, the following companies have submitted a request to cancel three pesticide products uses registered under section 3 or 24(c) of FIFRA containing chlorpyrifos-methyl. These registrations for which cancellations were requested are in Table 1.

TABLE 1.—REGISTRATIONS WITH PENDING REQUEST FOR CANCELLATION

Registration No.	Product Name	Intended Effective Date for Cancellation
7501-41	Gustafson Reldan 4E (43.%) Insecticide	December 31, 2004
62719-42	Reldan F Insecticidal (97.%)	December 31, 2004
62719-43	Reldan 4E (43.2%)	December 31, 2004

III. What is the Agency's Authority for Taking This Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**, make reasonable efforts to inform persons who rely on the pesticide, and provide a 30-day period in which the public may comment. Thereafter, the Administrator may approve such a request.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before May 24, 2002. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s)

have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will permit persons other than the registrant to sell, distribute, or use existing stocks for 1 year after December 31, 2003. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a Data Call-In. In all cases, product-specific

disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Registrants would not sell or distribute products bearing old labeling after the stamped approval date of new labels, i.e., labels that conform to the provisions of this document. The following are the existing stocks provisions for the three products being canceled.

Liquid Formulations and Manufacturing Use Product (7501-41, 62719-43, and 62719-42)

Liquid formulation and manufacturing use products bearing the EPA approved amended labels shall not be sold or distributed by registrants after December 31, 2003. Persons other than registrants may not sell, distribute, or use existing stocks after December 31, 2004. In lieu of putting end use dates on the label, registrants have agreed to

notify their distributors of the last use date and the rationale for it.

Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.
