D. What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

IV. What Information Collection Activity or ICR Does this Action Apply to?

EPA is seeking comments on the following ICR:

Title: TSCA Section 8(d) Health and Safety Data Reporting, Submission of Lists and Copies of Health and Safety Studies.

ICR numbers: EPA ICR No. 0575.09, OMB No. 2070-0004.

ICR status: This ICR is currently scheduled to expire on October 31, 2002. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to approval under PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Abstract: Section 8(d) of the Toxic Substances Control Act (TSCA) and 40 CFR part 716 require manufacturers and processors of chemicals to submit lists and copies of health and safety studies relating to the health and/or environmental effects of certain chemical substances and mixtures. In order to comply with the reporting requirements of section 8(d), respondents must search their records to

identify any health and safety studies in their possession, copy and process relevant studies, list studies that are currently in progress, and submit this information to EPA.

EPA uses this information to construct a complete picture of the known effects of the chemicals in question, leading to determinations by EPA of whether additional testing of the chemicals is required. The information enables EPA to base its testing decisions on the most complete information available and to avoid demands for testing that may be duplicative. EPA will use information obtained via this collection to support its investigation of the risks posed by chemicals and, in particular, to support its decisions on whether to require industry to test chemicals under section 4 of TSCA.

Responses to the collection of information are mandatory (see 40 CFR part 716). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

V. What are EPA's Burden and Cost Estimates for this ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for this collection of information is estimated to average 4.1 hours per response. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities: 569.
Frequency of response: On occasion.
Estimated average number of responses for each respondent: 12.5.
Estimated total annual burden hours: 2,344.

Estimated total annual burden costs: \$203,512.

VI. Are There Changes in the Estimates from the Last Approval?

There is a decrease of 2,198 hours (from 4,542 hours to 2,344 hours) in the total estimated respondent burden compared with that identified in the information collection request most recently approved by OMB. This change results from an updated analysis of the historical reporting patterns and the number of chemicals listed on the section 8(d) reporting rule (adjustment). Specifically, because no new chemicals were added to the rule during the previous ICR reporting period, the number of chemicals added during the 1993 through 1996 period were averaged over 8 years (1993 through 2000) to provide an estimate of expected reporting over the coming 3 year period of this ICR renewal. Unit burden estimates have not changed.

VII. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

A copy of the letter has been placed in the public record. The purpose of these proposals is to assist in characterizing potential health risks associated with the use of this fuel. The public is invited to comment on these proposals.

DATES: Comments must be submitted on or before June 20, 2002. Comments on the proposed Alternative Tier 2 provisions must be received from Lubrizol within 60 days of Lubrizol's receipt of the notification letter.

I. Introduction

Pursuant to sections 211(b)(2) and 211(e) of the Clean Air Act (CAA) EPA promulgated regulations requiring manufacturers of designated fuels and fuel additives (F/FA) to conduct tests to determine the potential health effects of the F/FA emissions. The final rule, promulgated May 27, 1994, established new health-effects testing requirements for the registration of designated F/FAs (59 FR 33042).

The registration requirements are organized within a three-tier structure. Tier 1 requires F/FA manufacturers to supply to EPA (1) the identity and
