Internal Revenue Service

Renewable Electricity Production Credit, Publication of Inflation Adjustment Factor and Reference Prices for Calendar Year 2002

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Publication of inflation adjustment factor and reference prices for calendar year 2002 as required by section 45(d)(2)(A) (26 U.S.C. 45(d)(2)(A)).

SUMMARY: The 2002 inflation adjustment factor and reference prices are used in determining the availability of the renewable electricity production credit under section 45(a).

DATES: The 2002 inflation adjustment factor and reference prices apply to calendar year 2002 sales of kilowatt

hours of electricity produced in the United States or a possession thereof from qualified energy resources.

Inflation Adjustment Factor: The inflation adjustment factor for calendar year 2002 is 1.1908.

Reference Prices: The reference prices for calendar year 2002 are 5.54¢ per kilowatt hour for facilities producing electricity from wind and 0¢ per kilowatt hour for facilities producing electricity from closed-loop biomass and poultry waste.

Because the 2002 reference prices for electricity produced from wind, closed-loop biomass, and poultry waste energy resources do not exceed 8¢ multiplied by the inflation adjustment factor, the phaseout of the credit provided in section 45(b)(1) does not apply to electricity sold during calendar year 2002.

Credit Amount: As required by section 45(b)(2), the 1.5¢ amount in section 45(a)(1) is adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale occurs. If any amount as increased under the preceding sentence is not a multiple of 0.1¢, such amount is rounded to the nearest multiple of 0.1¢. Under the calculation required by section 45(b)(2), the renewable electricity production credit for calendar year 2002 under section 45(a) is 1.8¢ per kilowatt hour on the sale of electricity produced from wind, closed-loop biomass, and poultry waste energy resources.
