

Avenue, Suite 130, West Palm Beach, FL 33401.

(5) Palm Beach County Government Center, Front Lobby Information Desk, 215 North Olive Avenue, West Palm Beach, FL 33401.

After the public comment period ends, USACE will consider all comments received, revise the Draft SEIS as appropriate, and issue a Final Supplemental Environmental Impact Statement. As part of the public involvement process, notice is hereby given by the USACE-Jacksonville District of a public meeting to be held at Town Hall Council Chambers, 360 S. County Road, Town of Palm Beach, Florida, beginning at 7 p.m. on September 12, 2002. The public meeting will allow participants the opportunity to comment on the Draft SEIS.

John A. Hall,

Alternate Federal Register Liaison Officer.

BILLING CODE 3710-AJ-M

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Supplemental Environmental Impact Statement for the Boston Harbor Navigation Improvement Project

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps), New England District is conducting a feasibility study and Supplemental Environmental Impact Statement (SEIS) to determine the navigation-related needs of the harbor, port facilities, and harbor users of Boston Harbor. This study will analyze deepening various shipping channels in Boston Harbor, Massachusetts. These include the entrance channel, main ship channel, Presidents Roads anchorage area, and the lower Reserved Channel, all from -40 feet mean lower low water (MLLW) up to -50 feet MLLW, the Chelsea River from -38 feet to -40 feet MLLW, and a portion of the Mystic River channel from -35 to -40 feet MLLW. Without deepening portions of Boston Harbor, the ships and port of Boston will be affected in three ways. (1) Existing shippers and their vessels will continue to experience tidal related inefficiencies with the current channel depths, including negating the full advantage of Massport's deeper 45-foot berths at the Conley Terminal. (2) The port will be unable to accommodate the

very large container vessels now beginning to serve the east coast of the United States from southern Asia via the Suez Canal. These vessels will not be able to use Boston efficiently with the current -40-foot channel depth. (3) As larger container and bulk vessels continue to come into service to replace existing vessels, Boston's lack of channel depth will erode its share of tonnage as New England cargo is redirected to the ports of New York-New Jersey and Halifax, Nova Scotia, and transported to New England by other means. Deepening the navigation channels in Boston Harbor would allow Boston to maintain a safe and efficient port.

DATES: September 5, 2002 from 1 to 4 p.m. at the Black Falcon Cruise Ship Terminal in South Boston, MA.

ADDRESSES: If you wish to be placed on the mailing list for this project, contact Mr. Michael Keegan, Project Manager, U.S. Army Corps of Engineers, New England District, Navigation Section, 696 Virginia Road, Concord, MA 01742.

FOR FURTHER INFORMATION CONTACT: If you have questions about the proposed action and the Draft SEIS, contact Mr. Keegan at (978) 318-8087.

SUPPLEMENTARY INFORMATION: The Corps participation in this study is authorized by a resolution of the Senate Subcommittee on Public Works dated September 12, 1969. This study was initiated at the request of the Massachusetts Port Authority (Massport), the study sponsor, using funds provided in the Fiscal Year 2000 Energy and Water Development Appropriations Bill.

Major navigation channel improvements (deepening) were made in 1999 through 2002 in the Reserved Channel, the Mystic River, Inner Confluence and the Chelsea River. A final Environmental Impact Statement (EIS) was prepared for the previous navigation improvement project in June of 1995. The current study would investigate the feasibility of deepening the main shipping channels in the port of Boston to a depth greater than the current authorized depths. This study, which will include the preparation of SEIS to the 1995 Record of Decision, will examine the engineering feasibility, economic justification, social and cultural resource impacts, and environmental acceptability of the proposed channel deepening. The existing -40-foot MLLW main harbor entrance channel from Broad Sound, through President Roads, and up to the Marine Terminal just seaward of the Ted Williams Tunnel will be examined for depths up to -50 feet MLLW, as

will the Reserved Channel. Deepening of a small area of the Mystic River Channel upstream of the Moran Terminal, from the current -35-foot depth to -40 feet will also be examined, as will deepening the Chelsea River Channel from the current -38-foot depth to -40 feet.

Alternatives: Dredging alternatives would examine the incremental depths from -40-feet to -50-feet MLLW (-38 feet in Chelsea River, and -35 feet in portions of the Mystic River) to determine the optimum economic plan. In addition, disposal alternatives would be determined based on the suitability of the material for open water disposal. Material suitable for ocean disposal would likely be disposed at the Massachusetts Bay Disposal Site. Material unsuitable for ocean disposal would most likely be disposed within a confined aquatic disposal (CAD) cell within the federal navigation channels above the Ted Williams Tunnel. The draft and final EIS for the previous Boston Harbor navigation improvement project investigated other alternative disposal sites for the disposal of dredged material.

The study will take about three years to complete and Massport and the Corps will share the study cost.

Scoping: Full public participation by interested federal, state, and local agencies as well as other interested organizations and the general public is invited. All interested parties are encouraged to submit their names and addresses (*see ADDRESSES*), to be placed on the mailing list for reviewing any fact sheets, newsletters, and related public notices. Massport will host a public meeting on the study on September 5, 2002 (*see DATES*). The public is invited to attend and further identify issues that should be addressed in the SEIS.

Dated: August 12, 2002.

Thomas L. Koning,

Colonel, Corps of Engineers, New England District.

BILLING CODE 3710-24-M

DEPARTMENT OF ENERGY

National Energy Technology Laboratory; Notice of Availability of a Financial Assistance Solicitation

AGENCY: National Energy Technology Laboratory, Department of Energy (DOE).

ACTION: Notice of availability of a Financial Assistance Solicitation.

SUMMARY: Notice is hereby given of the intent to issue Financial Assistance

Solicitation No. DE-PS26-02NT41613 entitled Development of Technologies and Capabilities for Developing Coal, Oil, and Gas Energy Resources. The Department of Energy (DOE), National Energy Technology Laboratory (NETL), is conducting this solicitation to competitively seek cost-shared applications for research and development of technologies enabling development of energy resources needed to ensure the availability of affordable energy for the Nation's future.

DATES: Potential applicants are required to submit a technical application, not to exceed twenty-five (25) pages. Based on the technical application, applicants will be selected to enter into negotiations leading to award of a cooperative agreement (financial assistance) for the project. All applications must be submitted through the Industry Interactive Procurement System (IIPS) system in accordance with the instructions in the solicitation. The solicitation will be available on DOE/NETL's Internet address at <http://www.netl.doe.gov/business> and on the "Industry Interactive Procurement System" (IIPS) webpage located at <http://e-center.doe.gov> on or about August 21, 2002. The deadline for submission of technical applications for each of the three evaluation periods will be identified in the solicitation.

FOR FURTHER INFORMATION CONTACT: Larry D. Gillham, MS 921-162, U.S. Department of Energy, National Energy Technology Laboratory, P.O. Box 10940, 626 Cochran Mill Road, Pittsburgh, PA 15236-0940, e-mail Address: gillham@netl.doe.gov. Telephone Number: (412) 386-5817.

SUPPLEMENTARY INFORMATION: Through this solicitation, NETL seeks applications in the following thirteen (13) separate (*i.e.*, stand alone) Areas of Interest:

Coal & Environmental Systems

- (1) Combustion Systems.
- (2) Environmental and Water Resources.
- (3) Carbon Sequestration.
- (4) Power Systems Advanced Research.
- (5) Vision 21 Technologies.
- (6) Coal Fuels and Hydrogen.
- (7) Gasification—*Not Available for Evaluation Period 1.*

Strategic Center for Natural Gas

- (8) Fuel Cells.
- (9) Gas Exploration, Production, Storage, and Hydrates.
- (10) Infrastructure Reliability for Natural Gas.

Petroleum

(11) Oil and Gas Environmental: Upstream.

(12) Petroleum Fuels.

(13) Transportation Fuels and Chemicals * * *.

Applicants must select and target only one (1) Area of Interest per application. DOE anticipates the award of multiple cost-sharing cooperative agreements under each Area of Interest. Approximately \$23.85 million of DOE funds is planned for this solicitation which will cover all Areas of Interest and all evaluation periods. It is anticipated that a total of 50-75 awards will be made as a result of this solicitation. In accordance with Section 3002 of the Energy Policy Act (EPAct), a minimum of 20% cost share will be required for each project. This solicitation includes multiple closing dates. Applicants will submit a technical application and after agency evaluation, the applicant will receive an e-mail notification that they have or have not been selected for negotiations leading to award. Those applicants selected for negotiations leading to award will be instructed in the notification e-mail that they must submit cost and other documentation as described in the solicitation. Selected applicants will generally have less than 30 days to submit the required cost and other documentation. Once released, the solicitation will be available for downloading from the IIPS Internet page, <http://e-center.doe.gov>. At this Internet site you will also be able to register with IIPS, enabling you to submit an application. If you need technical assistance in registering or for any other IIPS function, call the IIPS Help Desk at (800) 683-0751 or E-mail the Help Desk personnel at IIPS_HelpDesk@e-center.doe.gov. The solicitation will only be made available in IIPS. No hard (paper) copies of the solicitation and related documents will be made available.

Prospective applicants who would like to be notified as soon as the solicitation is available should subscribe to the Business Alert Mailing List at <http://www.netl.doe.gov/business>. Once you subscribe, you will receive an announcement by E-mail that the solicitation has been released to the public. Telephone requests, written requests, E-mail requests, or facsimile requests for a copy of the solicitation package will not be accepted and/or honored. Applications must be prepared and submitted in accordance with the instructions and forms contained in the solicitation. The actual solicitation

document will allow for requests for explanation and/or interpretation.

Issued in Pittsburgh, PA on August 16, 2002.

Dale A. Siciliano,

Deputy Director, Acquisition and Assistance Division.
