5. Employee Verification Service (EVS).

Background

Under Internal Revenue Service regulations, employers are required to provide wage and tax data to SSA using form W-2, Wage and Tax Statement or its electronic equivalent. As part of this process, the employer must furnish the employee's name and Social Security Number (SSN). This information must match SSA's records in order for the employee's wage and tax data to be properly posted to the Earnings Record. Information that is incorrectly provided to the Agency must be corrected by the employer using an amended reporting form, which is a labor-intensive and time-consuming process for both SSA and the employer. Therefore, to help ensure that employers provide accurate name and SSN information on their wage reports, SSA is offering the EVS service whereby employers can verify, via magnetic tape, cartridge, diskette, paper, and telephone, if the reported name and SSN of their employee matches SSA's records.

EVS Collection

SSA will use the information collected through the EVS to verify that the employee name and SSN information, provided by employers, matches SSA records. SSA will respond

to the employer informing them only of matches and mismatches of submitted information. Respondents are employers who provide wage and tax data to SSA who elect to use EVS to verify their employees' names and SSNs.

Type of Request: New information collection.

Number of Respondents: 100,000.

Frequency of Response: 5.

Average Burden Per Response: 10 minutes.

Estimated Annual Burden: 83,333 hours.

6. 20 CFR part 422.527, Private Printing and Modification of Prescribed Applications and Other Forms—0960-NEW. SSA uses the information required by this regulation to process requests from a person, institution or organization (requesting entities) that want to reproduce, duplicate, or privately print any SSA application or other form prescribed by SSA. The requesting entities must obtain prior approval from SSA and make their requests in writing, providing the required information set forth in the regulation. Respondents are the requesting entities that want to reproduce, duplicate, or privately print any SSA application or other form.

Type of Request: New information collection.

Number of Respondents: 4.

Frequency of Response: 1.

Average Burden Per Response: 8 minutes.

Estimated Annual Burden: ½ hour.

Medical Source Statement of Ability To Do Work-Related Activities (Physical), Form HA-1151; Medical Source Statement of Ability To Do Work-Related Activities (Mental), Form HA-1152; 20 CFR 404.1513 and 20 CFR 416.913-0960-NEW. SSA's Office of Hearing and Appeals (OHA) uses the HA-1151 (Physical) and its companion form HA-1152 (Mental) to collect information that Administrative Law Judges and the Appeals Council of OHA require to determine the residual functional capacity (RFC) of individuals who are appealing denied claims for benefits based on disability. RFC must be determined to decide cases that cannot be decided based on current work activity or on medical facts alone. Both forms are completed by medical sources that provide medical reports based either on existing medical evidence or on consultative examinations conducted for the purposes of the report. Respondents to these forms are medical sources that provide medical reports.
