

expenditures in connection with the Hawaii Special General Election by the close of books for the applicable report(s). (See chart below for the closing date for each report).

Since disclosing financial activity from two different calendar years on one report would conflict with the calendar

year aggregation requirements stated in the Commission's disclosure rules, unauthorized committees that trigger the filing of the Post-General Report will be required to file this report on two separate forms. One form to cover 2002 activity, labeled as the Year-End Report; and the other form to cover only 2003

activity, labeled as the Post-General Report. Both forms must be filed by February 3, 2003.

Committees filing monthly that support candidates in the Hawaii Special General should continue to file according to the monthly reporting schedule.

Proposed Project: A Community-based Intervention Model to Promote Neighborhood Participation in the Reduction of *Aedes aegypti* Larval Indices in Puerto Rico—New—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC). The *Aedes aegypti* mosquito transmits dengue, a mosquito-borne viral disease of the tropics. The symptoms of dengue disease include fever, headache, rash, retro-orbital pain, myalgias, arthralgias, nausea or vomiting, abdominal pain, and hemorrhagic manifestations.

Since there is no vaccine available to prevent dengue, prevention efforts are directed to control the vector mosquito. The limited efficacy of insecticides in preventing disease transmission has prompted the search for new approaches involving community participation.
