manufacturing opiate active pharmaceutical ingredients; about Houba's knowledge of and experience with the international marketplace, customs and practices associated with purchases of narcotic raw materials, and control of possible diversion of those materials; and about whether Houba's manufacturing facility complies with DEA's security requirements, including those pertaining to the transport of narcotic raw materials from their port of entry in the United States to Houba's facility. Finally, Penick asserts that Halsey has suffered serious financial difficulties and may be seeking an importer registration in order to attract potential investors and funding, and that Halsey has encountered various regulatory problems.

# Mallinckrodt's Comments

Mallinckrodt asserts that Houba bears but cannot meet the burden of providing that its application satisfies applicable legal standards; that DEA, pursuant to its "eighty-twenty rule" (21 CFR 1312.13(f), requires importers of narcotic raw material to purchase eighty percent of these substances from India and/or Turkey and the remaining twenty percent from Yugoslavia, France, Poland, Hungary, and/or Australia, which provides insurmountable cost advantages to foreign producers; that in order to demonstrate that its application is in the public interest, Houba must demonstrate not only that it has adequate physical security at its facility, but also that it has a proven technology for processing narcotic raw materials that meets federal regulatory requirements, a detailed marketing and business plan, plans and firm capital commitments for construction of the facility in which it will process narcotic raw materials, and personnel with experience and expertise to implement the proven technology with minimal

wastage of narcotic raw materials. Mallinckrodt further asserts that DEA is required to limit the number of importers and that the existing registrants provide an adequate supply under adequately competitive conditions. In addition, Mallinckrodt asserts that Houba should be required to demonstrate that, if registered, it would produce opiates from both opium and poppy straw concentrate, because failing to do so would violate DEA's "eighty-twenty-rule" and DEA's policy against permitting manufacturers to hold registrations and no use them, and because failing to do so would increase the instability of supply of narcotic raw materials. Finally, Mallinckrodt asserts that Halsey admits that it is in a precarious financial position, that Halsey is in a position to control Houba's management and operations, and that Halsey had a poor history of compliance with regulatory requirements throughout the 1990s; that it is uncertain whether Houba has the technical capability to process opium and poppy straw concentrate; and that Mallinckrodt has no knowledge that Houba has any experience in importing or extracting narcotic raw materials.
