NUCLEAR WASTE TECHNICAL REVIEW BOARD**Notice of Meeting**

Board Meeting: February 24 and 25, 2003—Las Vegas, Nevada: panels of the Nuclear Waste Technical Review Board will meet to review (1) seismic issues and (2) waste management system operations associated with a Yucca Mountain repository.

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act of 1987, on Monday, February 24, 2003, and Tuesday, February 25, 2003, panels of the Nuclear Waste Technical Review Board will meet in Las Vegas, Nevada, to review matters associated with a potential Yucca Mountain repository.

The meetings are open to the public, and opportunities for public comment will be provided. The Board is charged by Congress with reviewing the technical and scientific validity of U.S. Department of Energy (DOE) activities related to managing spent nuclear fuel and high-level radioactive waste.

The Board panel meetings will be held at the Best Western Tuscany Suites and Casino, 255 East Flamingo Road, Las Vegas, NV 89109. The telephone number is (702) 947-5918; the fax number is (702) 732-2564. The meeting will start at 8 a.m. each day.

On February 24, the Board's Panel on the Repository and Panel on Site Characterization will meet jointly to discuss seismic issues. Following he call to order and introductory statements, the panel will review how probabilistic earthquake ground motions were developed by the DOE. Project ground motions developed for the Yucca Mountain Project (YMP) will be discussed. The DOE will outline the YMP approach to both preclosure design and postclosure performance analyses for seismic events. The evaluation will include very low probability site-specific seismic ground motions, plans and/or conclusions, and the significance of geological observations on limiting ground motions. The presentations will include consideration of a general approach to postclosure seismic events on the response of waste package, drip shield, and the in-drift configuration as incorporated into performance and drift stability analyses. Following the technical presentations, a round-table will specifically address: Are ground motions realistic and/or appropriate in light of their intended use? If not, what might be an alternate approach? are the approaches to seismic preclosure and postclosure issues appropriate? If not, what might be some alternate approaches? Representatives of the State of Nevada will also participate in the meeting.

On February 25, the Board's Waste Management System Panel will meet to review the DOE's plans for operating the waste management system associated with a Yucca Mountain repository. Following the call to order and introductory statements, the panel will review the DOE's plans for waste acceptable at nuclear power plants and other points of origin. The DOE will then discuss its efforts to develop a transportation plan for transporting spent fuel and high-level radioactive waste to a Yucca Mountain repository. A presentation on industry experience in transporting highly radioactive materials will be followed by
