Each program that is nominated should have been standardized (including curriculum manuals, implementation manuals, videotapes, etc.), well implemented, and findings should derive from well designed research efforts. Program models nominated are

reviewed and rated by experts annually to be recommended to the field. CSAP is revising the Registration Form by eliminating collection of information pertaining to the National Prevention System.

CSAP promotes selected models by providing funds to support development of program materials for dissemination,

by connecting program developers with organizations able to help in the dissemination efforts, and by promoting model programs nationally through CSAP's State Incentive Grant recipients and regional Centers for Applied Prevention Technology. Annual burden estimates for the Registry are shown in the table below.

*Proposed Project: The Annual Census of Patient Characteristics in State and County*

*Mental Hospital Inpatient Services (0930-0093, Extension)*—The Census, which is conducted by SAMHSA's Center for Mental Health Services (CMHS), is a complete enumeration of all State and county mental hospitals and collects aggregate information by age, gender, race/ethnic identity and diagnosis for each State on the number of additions during the year and resident patients who are physically present for 24 hours per day in the inpatient service at the end of the reporting year. First conducted in 1840, the Census has provided information throughout the years that is not available from any other sources.
