Proposed Project: Support for State Oral Disease Prevention Program Infrastructure Development Evaluation Reporting—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

In 2000, the Surgeon General published the first ever report on oral health in America to alert Americans to the full meaning of oral health and its importance to general health and well-being. Included in the framework for action was the charge to build an effective oral health infrastructure that meets the oral health needs of all Americans and integrates oral health effectively into overall health planning. In response, the CDC will award funds for cooperative agreements to an estimated total of 13 demonstration sites in two phases, for the planning and implementation of oral health capacity infrastructure building and demonstration delivery programs. Building infrastructure enables the demonstration states to develop the capacity to achieve Healthy People 2010 objectives and reach many more Americans than a single local program could reach and to potentially sustain health gains beyond the funding cycle.

Infrastructure development encompasses many activities, each of which can be accomplished in a myriad of methods by the grantees. To summarize and track vital development information across grantee sites, a uniform reporting system must be established for the demonstration sites. Obtaining uniform data will allow the construction of summary reports to assist future sites and not-yet-funded oral health infrastructure development programs.

Evaluation tracking reporting for this project would describe the implementation of each site's infrastructure model in relation to environmental context and state characteristics. The results would provide evidence for the essential
