NUCLEAR REGULATORY COMMISSION

[Docket No. 50-440]

FirstEnergy Nuclear Operating Co., Perry Nuclear Power Plant; Exemption**1.0 Background**

The FirstEnergy Nuclear Operating Company (FENOC/ the licensee) is the holder of Facility Operating License No. NPF-58 which authorize operation of Perry Nuclear Power Plant (PNPP). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility consists of a boiling water reactor located on FENOC's Perry site, which is located in Lake County, Ohio.

2.0 Request/Action

Title 10 of the *Code of Federal Regulations* (10 CFR) part 50, § 50.71(e)(4) requires that licensees provide the Nuclear Regulatory Commission (NRC) with updates to the Final Safety Analysis Report (FSAR) annually or 6 months after each refueling outage provided the interval between successive updates does not exceed 24 months. The revisions must reflect changes up to 6 months prior to the date of filing. This regulation would require the submittal of the PNPP FSAR update by September 10, 2003.

The licensee has requested a one-time schedular exemption from the requirements of 10 CFR 50.71(e)(4). The proposed exemption would extend the PNPP submittal date up to 120 days beyond the required filing date of September 10, 2003. The new filing date would be January 8, 2004. The requirement to reflect changes up to 6 months prior to the date of filing would still apply.

3.0 Discussion

By letter dated August 8, 2003, the licensee requested a one-time schedular exemption from the requirements of 10 CFR 50.71(e)(4). Specifically, the licensee requested that it be permitted to delay the required update from September 10, 2003, to January 8, 2004, which is a 120 day delay.

Pursuant to 10 CFR 50.12, the Commission may, upon application by any interested person or upon its own
