FEDERAL MARITIME COMMISSION
Ocean Transportation Intermediary License Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission an application for license as a Non-Vessel Operating Common Carrier and Ocean Freight Forwarder—Ocean Transportation Intermediary pursuant to section 19 of the Shipping Act of 1984 as amended (46 U.S.C. app. 1718 and 46 CFR part 515).

Persons knowing of any reason why the following applicants should not receive a license are requested to contact the Office of Transportation Intermediaries, Federal Maritime Commission, Washington, DC 20573.

Non-Vessel Operating Common Carrier Ocean Transportation Intermediary Applicants

Expert Cargo Int'l Co., 11200 S. Hindry Avenue, 2nd Floor, Los Angeles, CA 90045, Scott Jang, Sole Proprietor.
 Seahawk Logistics, Inc., 520 Carson Plaza Court, Suite #206, Carson, CA 90746, Officer: Sang Gyu Park, President (Qualifying Individual).

Non-Vessel Operating Common Carrier and Ocean Freight Forwarder Transportation Intermediary Applicants

Dietrich Exccel LLC. dba Nautilus Global Shipping LLC, 7818 NW 46th Street, Miami, FL 33166, Officers: Waldyr Silva, General Manager (Qualifying Individual), Joao Carlos Villaca, Partner.

MH Transport, LLC, 1720 North Sam Houston Parkway East, Houston, TX 77032, Officers: Thomas Lyle Armel, Vice President (Qualifying Individual), Olivia Decaro, President.

Dated: December 5, 2003.

Bryant L. VanBrakle,
Secretary.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 498-1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-E11, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: Ecology of Bats in Households: A Case-Control Study for Assessing Knowledge, Attitudes, and Health Risks—New—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC).

Bats are associated with many different kinds of infectious diseases that may be pathogenic to humans. Anthropogenic change from urban sprawl provides new roosts for bats in homes and buildings while reducing available natural roosts and putting humans in more frequent contact with

bats. The largest public health concern with respect to bat exposure is the transmission of rabies virus—about 75% of human rabies deaths are from bat-associated rabies variants. The current U.S. guidelines for animal rabies prevention and control recommend that bats be excluded from houses and adjacent structures to prevent direct association with humans. While direct association with bats is certainly a risk factor for rabies transmission, little is known about the effects of indirect association with bats and potential adverse health effects. This is of public health concern because many organizations actually promote interactions between bats and humans, without consideration of public health consequences.

The proposed study consists of an investigator-administered questionnaire conducted on site. The survey asks individuals to describe knowledge and attitudes of household members toward cohabitation with bats, including knowledge of rabies risk, general attitude toward bats, and attempts to exterminate the roosts. The questionnaire will also evaluate health outcomes among household members and their pets by administering a survey focused on general well-being, incidence of allergies, frequency and nature of hospital/clinic visits, frequency of bat and bat-ectoparasite exposure, and frequency of post-exposure prophylaxis for rabies. We will also conduct a serological survey for evidence of exposure to bat-associated infectious diseases.

The list of households with roosts is provided by Colorado State University bat researchers, identified through radio-tagging of bats. We plan to improve the knowledge of the ecology of bats and associated rabies transmission by assimilating rabies prevalence data in a bat population with data regarding the roost ecology and bat/human interaction ecology in a rapidly sprawling suburban area in Ft. Collins, Colorado. There is no cost to the respondents.

Respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hours)	Total burden (in hours)
Telephone enrollment	150	1	6/60	15
Investigator-administered survey	600	1	45/60	450
Total				465

Proposed Project: Surveillance for Ciguatera Fish Poisoning in Recreational Fishers Utilizing Texas Gulf Coast Oil Rigs—New—National Center for Environmental Health (NCEH), Centers

for Disease Control and Prevention (CDC).

This public health surveillance activity will quantify the scope of ciguatera poisonings in the recreational fishing community of coastal Texas. The Texas Department of Health has received reports of ciguatera-toxic fish caught on Texas offshore oil rigs, but anecdotal reports to researchers at the University of Texas suggest that the incidence of ciguatera fish poisoning is greater than what has been reported to the Texas Department of Health. We propose to conduct surveillance activities to identify the prevalence of ciguatera fish poisoning in Texas Gulf Coast oil rigs. This study will provide critical data in guiding efforts to characterize the scope of ciguatera poisonings, to identify risk factors, and to prevent an emerging illness associated with reef ecosystems.

A questionnaire will be administered over a one-year period to recreational spear-fishers and to hook-and-line anglers who have consumed fish caught on the reef ecosystems off the Texas gulf coast. There is no cost to respondents.

Respondent	Number of respondents	Number of responses/respondent	Average burden per response (in hours)	Total burden (in hours)
Texas Saltwater Fishers	500	1	20/60	167
Total				167

National Center for Research Resources; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice

is hereby given of a meeting of the National Advisory Research Resources Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contact proposals and the discussions could disclose confidential

trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Research Resources Council.

Date: January 22, 2004.

Open: 8:30 a.m. to 2:45 p.m.

Agenda: Report of Center Director and other issues.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 10, Bethesda, MD 20892.

Closed: 2:45 pm to Adjournment.

Agenda: To review and evaluate grant applications.
