

Frequency of Response: On occasion reporting requirements.

Total Annual Burden: 2,750 hours.

Total Annual Cost: \$2,689,500.

Needs and Uses: FCC Form 349 is used to apply for authority to construct a new FM translator or FM booster broadcast station, or to make changes in the existing facilities of such stations. To satisfy the third party requirements under 47 CFR 73.3580, applicants must give notice of their applications for new or major changes in facilities in a local newspaper within 30 days, and copy of both the notice and the application must be placed in the public inspection. In addition, all mutually exclusive NCE proposals for the reserved band currently on file with the FCC are required to supplement their applications with portions of the revised FCC Form 349 necessary to make a selection under the new point system. The FCC will issue a public notice announcing the procedures to be used in this process. The data help the FCC to determine whether an applicant meets basic statutory requirements and will not cause interference to other licensed broadcast services. Where there are mutually exclusive, qualified applicants, the information is used to determine which proposal best serves the public interest.
