

from the U.S. orbit locations in Amendment to the Commission's Regulatory Policies Governing Domestic Fixed Satellites and Separate International Satellite Systems, *Report and Order* ("DISCO I"), 11 FCC Rcd 2429 (1996), that decision had no effect on DBS operators' obligation to comply with the ITU Region 2 Band Plan.

Therefore, the Commission finds that DISCO I should not be read to mean that the DBS licenses that it intends to assign by competitive bidding are to be used to provide an international satellite service, or to establish a basis for concluding that the auction prohibition of the ORBIT Act should apply to such U.S.-assigned DBS licenses. The Commission's conclusion that DBS service from the eight orbit locations assigned to the United States is predominantly domestic is consistent with actual service offerings and does not represent a departure from DISCO I.

B. Eligibility for the Three Available Western DBS Licenses

9. The Commission declines to adopt any eligibility restrictions for the three available DBS licenses at the 175° W.L., 166° W.L., and 157° W.L. orbit locations. In the part 100 proceeding, it considered a wide range of questions relating to whether ownership restrictions of any kind are appropriate for the DBS service, and it concluded that generally they were not.

10. No commenter proposed any eligibility restrictions for the available licenses at the 175° W.L., 166° W.L., and 157° W.L. orbit locations. This results in a record that lacks information regarding circumstances that would cause the Commission to impose eligibility restrictions in the DBS service with respect to these three licenses. Therefore, based on the record before it, the Commission concludes that there is no reason for it to deviate from any of its decisions in the *Part 100 R&O* as they apply to these licenses.

11. On the other hand, the Commission has received detailed comments presenting a number of arguments regarding the issue of whether it should adopt eligibility restrictions for the available license at 61.5° W.L. The Commission will address the matter of eligibility for the 61.5° W.L. license in a separate order, which it will issue as soon as it resolves the relevant issues that have been raised with respect to that license.

IV. Conclusion

12. For the reasons stated above, the Commission concludes that it has the authority to auction DBS licenses for the use of channels at the eight orbit

locations to which the United States is assigned under the ITU Region 2 Band Plan, and that this authority has not been altered or diminished by the Commission's adoption of DISCO I or the enactment of section 647 of the ORBIT Act. The Commission also concludes that no eligibility restrictions on the available DBS licenses at the 175° W.L., 166° W.L., and 157° W.L. orbit locations are warranted, and it will maintain its policy of open eligibility for these licenses. The Commission reaches no conclusions concerning whether it should impose any eligibility restrictions on the license for the two unassigned channels at the 61.5° W.L. orbit location and defers the resolution of that issue to a separate order.

V. Ordering Clause

13. Accordingly, it is ordered that, pursuant to sections 4(i), 303(r), and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), and 309(j), the DBS Order is hereby adopted.
