Expiration Date of Approval: July 31, 2004.

Type of Request: Extension.

Abstract: Executive Order 12862, issued September 11, 1993, directed

Federal agencies to change the way they do business, to reform their management practices, and to provide service to the public that matches or exceeds the best service available in the private sector. In response to this Executive Order, the Forest Service Southern Research Station developed a "Publication Comment Card" for inclusion when distributing scientific research publications.

Since the early 1920's, Forest Service scientists have published the results of their studies about national forests and forest resources and products, in addition to their conclusions about the dynamics of natural timber stands and plantations, watershed and wildlife management, and recreational activities. These studies have provided long-term data that have become increasingly valuable to landowners and others involved in natural resource and land management. Data from the Publication Comment Cards help Forest Service research stations determine if publications meet customers' expectations and address customers' needs. The collected information also helps scientists and authors provide relevant information on effective, efficient, responsible land management in the United States.

Forest Service research personnel enclose Publication Comment Cards when providing publications to recipients in person or by mail. Public Comment Cards and most research station publications also are made available via the Internet. Public Comment Cards include the following statements that will be rated on a scale of 1 to 5, with 1 being "Strongly Agree" and 5 being "Strongly Disagree."

1. The information is what I expected, based on the title and abstract.
2. This publication is well organized.
3. The content is presented clearly.
4. The technical subject matter was explained sufficiently to meet my needs.
5. The graphics (photographs, tables, charts) were helpful.
6. This research information is useful to me.
7. I will continue to request Research Station publications.

Respondents complete Publication Comment Cards and return them in person or mail them back to the Forest Service via surface mail or electronically via the Internet.

Data gathered in this information collection are not available from other sources.

Estimate of Burden: 5 minutes.

Type of respondents: Respondents include citizens of the United States and of other countries; landowners or land lessees; timber and other forest-product

customers; research scientists; forestry consultants; educators, librarians, and historians; representatives of other Federal, State, county, or local government agencies and representatives of foreign governments.

Estimated Number of Respondents: 22,000.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 1,833 hours.

Comment is invited on: (a) Whether the proposed collection of information is necessary for the stated purposes and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
