

FAR Part 150, Section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute a FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where Federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Denver, Colorado.

The Airport Director of Jackson Hole Airport submitted to the FAA the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted at Jackson Hole Airport. The Jackson Hole Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on November 19, 2003. Notice of this determination was published in the **Federal Register** on December 2, 2003.

The Jackson Hole Airport noise compatibility program contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 2008. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in 49 U.S.C. Sec. 47504(a). The FAA began its review of the program on November 19, 2003, and was required by a provision of 49 U.S.C. Sec. 47504(b) to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The FAA completed its review and determined that the procedural and substantive requirements of 49 U.S.C. Sec. 47504(b) and FAR 150 have been satisfied. The overall program, therefore, was approved by the Associate Administrator for Airports effective May 17, 2004.

These determinations are set forth in detail in a Record of Approval endorsed by the Associate Administrator for Airports on May 17, 2004. The Record of Approval, as well as other evaluation materials and the documents

comprising the submittal are available for review at the FAA office listed above and at the administrative offices of the Jackson Hole Airport.

Issued in Renton, Washington, on June 4, 2004.

David A. Field,

Manager, Planning, Programming, and Capacity Branch, Northwest Mountain Region.
