**Affected entities:** Entities potentially affected by this action are those which produce pesticides.

**Title:** EPA Application for Registration of Pesticide-Producing Establishments (EPA Form 3540-8); Notification of Registration of Pesticide-Producing Establishments (EPA Form 3540-8A) and Pesticide Report for Pesticide-Producing Establishments (EPA Form 3540-16). EPA ICR Number: 0160.08, OMB Control Number 2070-0078. Scheduled to expire on July 31, 2005.

**Abstract:** The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 7(a) requires that any person who produces pesticides or active ingredients subject to the Act must register with the Administrator of EPA

the establishment in which the pesticide is produced. This section further requires that the application for registration of any establishment shall include the name and address of the establishment and of the producer who operates such an establishment. EPA Form 3540-8, Application for Registration of Pesticide-Producing Establishments, is used to collect the establishment registration information required by this section.

FIFRA section 7(c) requires that any producer operating an establishment registered under section 7 report to the Administrator within 30 days after it is registered, and annually thereafter by March 1st for certain pesticide/device production and sales/distribution information. The producers must report which types and amounts of pesticides, active ingredients, or devices are currently being produced, were produced during the past year, sold or distributed in the past year. The supporting regulations at 40 CFR part 167 provide the requirements and time schedules for submitting production information. EPA Form 3540-16, Pesticide Reports for Pesticide-Producing Establishments, is used to collect the pesticide production information required by section 7(c) of FIFRA.

Establishment registration information, collected on EPA Form 3540-8, is a one-time requirement for all pesticide-producing establishments. Pesticide production information, reported on EPA Form 3540-16, is required to be submitted within 30 days of receipt of the Notification of Registration of Pesticide-Producing Establishments (EPA Form 3540-8A), and annually thereafter on or before March 1.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

*Burden:* The average annual burden to the industry over the next three years is estimated to be 2 person hours per response.

*Respondents/affected entities:* 13,000.

*Estimated number of respondents:* 13,000.

*Frequency of responses:* 1.

*Estimated total annual hour burden:* 26,000.

There are no capital/startup costs or operating and maintenance (O&M) costs associated with this ICR since all equipment associated with this ICR is present as part of ordinary business practices.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: January 10, 2005.

### Adequacy Determination for the St. Louis Area Ozone Maintenance State Implementation Plan for Transportation Conformity Purposes; State of Missouri

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of adequacy determination.

**SUMMARY:** In this notice, EPA is informing the public that we have found the motor vehicle emissions budgets (MVEB) for volatile organic compounds and nitrogen oxides in the Missouri portion of the St. Louis area adequate for conformity purposes. The State of Missouri established MVEBs for 2007. The emission estimates for 2007 were included in the 1-hour ozone maintenance plan based on projected emission inventories for that year. This Notice formalizes the 2007 emissions estimates as budgets for future conformity determinations, including the conformity determination that is required by June 15, 2005, under the 8-hour ozone standard.

**DATES:** This rule is effective February 10, 2005.

**ADDRESSES:** The finding and the response to comments will be available at EPA's conformity Web site: <http://www.epa.gov/otaq/transp/traqconf.htm> (click on "Adequacy Web Pages").

**FOR FURTHER INFORMATION CONTACT:** You may also contact Heather Hamilton, Environmental Protection Agency, 901 N. 5th Street, Kansas City, Kansas 66101, or by e-mail at [hamilton.heather@epa.gov](mailto:hamilton.heather@epa.gov), telephone (913) 551-7039.

**SUPPLEMENTARY INFORMATION:**

Throughout this document whenever "we," "us," or "our" is used, we mean EPA.

Transportation conformity is required by section 176(c) of the Clean Air Act. EPA's conformity rule requires that transportation plans, programs, and projects conform to State Implementation Plans (SIPs) and established the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the National Ambient Air Quality Standards. The SIPs must establish MVEBs to ensure that conformity is achieved.

The criteria by which we determine whether SIP motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). We applied these criteria in finding that the submitted budgets are adequate.

We sent a letter to the Missouri Department of Natural Resources on December 17, 2004, stating that the motor vehicle emissions budgets in the St. Louis area for 2007 were found to be adequate. These budgets were projected emissions in the 1-hour ozone maintenance plan for St. Louis, although EPA approved a MVEB for
