

Actions Common to All Alternatives

All three alternatives share the following concepts and techniques for achieving the goals of the refuge:

- Cooperating with State and Federal agencies, non-government organizations, and Dominion Power Company to evaluate the effects of managed flows on the Roanoke River floodplain on the refuge's natural resources;
- Cooperating with the North Carolina Wildlife Resources Commission to administer a hunting program on the refuge;
- Cooperating with the Partnership for the Sounds and Roanoke River Partners to promote nature-based tourism;
- Monitoring populations of neotropical songbirds and the health of bottomland hardwood forest stands; and
- Encouraging scientific research on the refuge.

Roanoke River National Wildlife Refuge, in northeastern North Carolina, consists of 20,978 acres, of which 13,824 acres are baldcypress-water tupelo swamp and 7,154 acres are bottomland hardwood forests. These forests support a variety of wildlife species, including neotropical migratory songbirds, waterfowl, colonial nesting birds, deer, turkey, and squirrels.

The refuge hosts 20,000 visitors annually who participate in hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation.

Background

The Arnaudo Brothers, Wathen-Castanos, and River East Holding Sites (Applicants) have applied to the Service for incidental take permits pursuant to section 10(a)(1)(B) of the Endangered Species Act (Act) of 1973, as amended. The Service is considering issuing 10-year permits to the Applicants that would authorize take of the endangered kit fox incidental to otherwise lawful activities associated with the residential and commercial development of four sites in Merced County, California. The projects would result in the incidental take of kit fox on the project sites
