Request for Technical Input—Standards in Trade Workshops**AGENCY:** National Institute of Standards and Technology.**ACTION:** Request for workshop recommendations.

SUMMARY: The National Institute of Standards and Technology (NIST) invites interested parties to submit recommendations for workshops covering specific sectors and targeted countries or regions of the world where training in the U.S. system of standards development, conformity assessment, and metrology may facilitate trade. Prospective workshops may be scheduled for one or two week periods. This notice is not an invitation for proposals to fund grants, contracts or cooperative agreements of any kind. NIST will offer a limited number of workshops, based upon the availability of resources. Recommenders are encouraged to consider departmental priorities outlined in part of the soon-to-be released National Export Strategy. NIST will consider recommendations based upon which workshops would be most useful to intended audiences. Additional information about the NIST Standards in Trade Workshops is available at <http://ts.nist.gov/ts/htdocs/210/gsig/sitdescr.htm>.

DATES: All recommendations must be submitted no later than 5 p.m., June 3, 2005.

SUPPLEMENTARY INFORMATION: The Standards in Trade Workshops are a major activity of the Global Standards and Information Group in the NIST Standards Services Division (SSD). The workshops are designed to provide timely information to foreign standards

officials on U.S. practices in standards and conformity assessment. Participants are introduced to U.S. technology and principles in metrology, standards development and application, and conformity assessment systems.

Each workshop is a one or two week program offering an overview of the roles of the U.S. Government, private sector, and regional and international organizations engaged in standards development and conformity assessment practices. Specific workshop objectives are to: (1) Familiarize participants with U.S. technology and practices in metrology, standardization, and conformity assessment; (2) describe and understand the roles of the U.S. Government and the private sector in developing and implementing standards; and (3) develop professional contacts as a basis for strengthening technical ties and enhancing trade.
