SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to request an extension for the quarterly retirement

survey. The quarterly survey was initiated by the Census Bureau in 1968 at the request of both the Council of Economic Advisers and the Federal Reserve Board. It gathers data on the assets of the 100 largest state and local government public-employee retirement systems. These systems hold over \$2 trillion in assets, which represent approximately 90 percent of all state and local government public-employee retirement system assets.

These important data are used by the Federal Reserve Board to track the public sector portion of the flow of funds accounts. The Bureau of Economic Analysis uses the data on corporate stock holdings to estimate dividends received by state and local government public-employee retirement systems. These estimates, in turn are used as a component in developing the national income and product accounts.

II. Method of Collection

Canvass methodology consists of a mail out/mail back questionnaire. Responses are screened manually, then put into an electronic format. No statistical methods are used to calculate the data.

Respondents may choose to report their data over our Internet site. In addition to reporting current quarter data on the Internet, respondents may report for the first time for the previous two quarters or submit revisions to their previously submitted data if needed.

In those instances when we are not able to obtain a response, estimates are made for nonrespondents based on historical data for that same system.

III. Data

OMB Number: 0607-0143.

Form Number: F-10.

Type of Review: Regular.

Affected Public: State and local government retirement systems.

Estimated Number of Respondents: 100.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Section 182.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to conduct a Precanvass Operation in preparation for the 2007 Commodity Flow Survey to improve the efficiency and accuracy of the sample frame. The Commodity Flow Survey itself will be the subject of a later notice planned for publication in early 2006.

The Commodity Flow Survey, a component of the Economic Census, is the only comprehensive source of multi-modal, system-wide data on the volume and pattern of goods movement in the United States. The Commodity Flow Survey is conducted in partnership with the Bureau of Transportation Statistics, U.S. Department of Transportation.

In conducting the Precanvass, the Census Bureau will mail a one-page questionnaire to selected manufacturing, mining, and wholesale establishments, and to enterprise support establishments in its Business Register. The precavass will determine if these establishments are engaged in shipping activities, and if so obtain an estimate of the annual value of those shipments, along with contact information for the 2007 Commodity Flow Survey. Those establishments that do not ship will be eliminated from the sample frame. This will significantly improve the sample for the 2007 Commodity Flow Survey. Also, those establishments excluded from the sample frame will be saved the added burden of reporting in the Commodity Flow Survey.

II. Method of Collection

The Census Bureau will mail the Precanvass Questionnaire to (a) enterprise support establishments in the Census Bureau's Business Register, and (b) the largest establishments in the industries listed above that are likely to be included in the 2007 Commodity Flow Survey. The estimated size of the Precanvass mailing is 75,000 establishments.

The Census Bureau will use a mail-out, mail-back methodology, with telephone follow-up for selected non-response cases. General information on shipping activity and value of shipments will be collected via check box style questions. Contact information also will be collected and used to improve the mailing and follow-up activities for the 2007 Commodity Flow Survey.
