This long-term watershed plan development portion of the Consent Decree requires submission of a framework for developing watershed plans within six months of entry of the Consent Decree; submission by December 2008 of a watershed plan for each of the four watersheds, including a Long Term Control Plan and a Sanitary Sewer Overflow Plan; and submission every five years thereafter of updated watershed plans, through December 2025, at which time the Consent Decree requires full compliance with Combined Sewer Overflow water quality standards criteria and the elimination of all unpermitted discharges. The District will pay a civil penalty of \$476,000, with \$338,200 going to Kentucky and \$138,000 going to the United States. SUPPLEMENTARY INFORMATION:

I. Background

Government contractors provide information on their personnel activities and the results of their affirmative action efforts to employ and promote minorities and women. This information is used to select specifically identified contractors for compliance evaluations and compliance assistance. These requirements have been established under Executive Order 11246, as amended; Section 503 of the Rehabilitation Act of 1973, as amended; and the Vietnam Era Veterans' Readjustment Assistance Act, as amended, 38 U.S.C. 4212. Implementing regulations are at 41 CFR Chapter 60. The regulations at 41 CFR part 60-2.18 authorize the collection of data by OFCCP through the use of the EO Survey. In addition, the regulations at 41 CFR part 60-1.12 require contractors to collect and retain employment and other related records. The EO Survey is a request for some of those data. With these data, the Survey is intended to improve the selection of contractors for compliance evaluations which are used to determine compliance with the non-discrimination and equal employment opportunity (EEO) regulations. This information collection is currently approved for use through December 31, 2005.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- * Enhance the quality, utility and clarity of the information to be collected; and

- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks a three year extension of approval to collect this information in order to permit OFCCP the time to continue its assessment and evaluation of the EO Survey. During this period, OFCCP will conduct a cost benefit analysis to examine the effectiveness of the EO Survey; as a useful tool in the selection of contractors that are not in compliance with their Equal Employment Opportunity and non-discrimination obligations. The OFCCP seeks a three year extension to the approval of the Equal Opportunity Survey. There is no change in the substance or method of collection since the last OMB approval.
