The Proposal

The FAA is considering an amendment to 14 CFR part 71 by modifying the Class E airspace area at Palm Springs International Airport, Palm Springs, CA. The establishment of a RNAV (RNP) Y IAP to RWY 13R at Palm Springs International Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (RNP) Y IAP to RWY 13R at Palm Springs International Airport has made this proposal necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the RNAV (RNP) Y IAP to RWY 13R at Palm Springs International Airport, Palm Springs, CA. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9N dated September 1, 2005, and effective September 16, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

I. Background

The Clean Air Act requires that 13 states including the District of Columbia submit revisions to their State Implementation Plans that will require major new and major modified sources of volatile organic compounds (VOC) or nitrogen oxides (NO_x) to meet certain new source review (NSR) requirements if they are located (or are proposing to locate) in the Ozone Transport Region.

Section 184 of the Act establishes the OTR, which consists of the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and the Consolidated Metropolitan Statistical Area that includes the District of Columbia and portions of Virginia.
