

Use EPA's electronic docket and comment system at <http://www.regulations.gov>, to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov>, as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to <http://www.regulations.gov>.

Title: NESHAP for Brick and Structural Clay Manufacturing (Renewal).

ICR Numbers: EPA ICR Number 2022.03, OMB Control Number 2060-0508.

ICR Status: This ICR is scheduled to expire on May 31, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for brick and structural clay products (BSCP) manufacturing, were proposed on July 22, 2002 (67 *FR* 47894), promulgated on May 16, 2003 (68 *FR* 26690). These standards apply to each existing, new or reconstructed BSCP manufacturing facility.

Owners or operators of the affected facilities must make the following notification: (1) Initial notification, (2) notification of initial performance test, (3) notification of compliance status. Affected sources must submit a compliance report, and a startup, shutdown, and malfunction (SSM) plan. Respondents are also required to maintain records of the occurrence and

duration of any startup, shutdown, or malfunction.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 85 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Brick and structural clay manufacturing facilities.

Estimated Number of Respondents: 72.

Frequency of Response: On occasion, semiannually and initially.

Estimated Total Annual Hour Burden: 14,086.

Estimated Total Annual Cost: \$1,125,915, which includes \$10,000 annualized capital, start up costs, \$5,000 annualized O&M costs, and \$1,110,915 O&M costs.

Changes in the Estimates: There is a decrease of 3,385 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The decrease in burden from the most recently approved ICR is due to the requirements of the standard that states all existing facilities must be in

full compliance three years after promulgation, which would be the fourth year or the first year of this renewal ICR. All existing sources, along with the additional new source would be fulfilling the applicable standards thus, justifying the decrease in respondent's burden as compared to the active ICR.

There is a decrease in the capital/startup and operations and maintenance (O&M) costs from the previous ICR. The reason for this decrease is also due to the fact that all existing facilities are required to be in full compliance during the fourth year, thus reflecting the decrease incurred in this renewal ICR.

Dated: May 8, 2006.

Oscar Morales,

Director, Collection Strategies Division.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202-564-7167. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 7, 2006 (71 FR 17845).

Draft EISs

EIS No. 20060083, ERP No. D-AFS-K65301-AZ, Jacob Ryan Vegetation Management Project, Implementation, Kaibab National Forest, North Kaibab Ranger District, Coconino County, AZ.

Summary: EPA expressed environmental concerns about potential effects to regional air quality, water quality, and old growth forest; and recommended that the final EIS include a more detailed air quality effects analysis, implementation plan for BMPs, and management strategy to maintain old growth forest. Rating EC2.

Final EISs

EIS No. 20060139, ERP No. F1-AFS-K65269-CA, Southern California National Forests Land Management Plans, Revision of the Angeles, Cleveland, Los Padres, and San Bernardino National Forests Land

Management Plans, Implementation, San Bernardino, Riverside, and San Diego Counties, CA.

Summary: No comment letter was sent to the preparing agency.

EIS No. 20060076, ERP No. F-CGD-G39043-00, Main Pass Energy Hub Deepwater Port License Application, Proposes to Construct a Deepwater Port and Associated Anchorages, U.S. Army COE Section 10 and 404 Permits, Gulf of Mexico (GOM), southeast of the coast of Louisiana in Main Pass Lease Block (MP) 2999 and from the Mississippi coast in MP 164.

Summary: EPA appreciates the improvements that have been incorporated into the proposed LNG project; therefore, concludes that the ORV technology would result in minor adverse impacts to water quality and biological resources. EPA recommends that USCG and the Maritime Administration consider operational modifications to further reduce impacts.

EIS No. 20060111, ERP No. FC-COE-H36012-MO, St. Johns Bayou and New Madrid Floodway Project, Channel Enlargement and Improvement, Revised Information to Clarify and Address Issues of Concern, Flood Control National Economic Development (NED), New Madrid, Mississippi and Scott Counties, MO.

Summary: EPA does not object to proposed project.

Dated: May 16, 2006.

Robert W. Hargrove,
Director, NEPA Compliance Division, Office of Federal Activities.
