

deepening the Bayou Casotte channel to 42 feet by 350 feet from the junction with of the main channel to the mouth of Bayou Casotte, a distance of about 3 and 1/2 miles; with additional widening at the mouth to provide a turning basin with a total turning diameter of 1,150 feet, including the channel width; relieving the northern portion of the area between the junction with the main ship channel from the present 500 feet to 1,000 feet, and widening the bend at the mouth of Bayou Casotte from the present 50 feet to 100 feet to provide a total width at the bend of 450 feet. A Final EIS for the Designation of an Ocean Dredged Material Disposal Site (ODMDS) located offshore Pascagoula, MS was prepared in July 1991. Construction of all phases of the improvements, except for the Entrance channel being widened to 550 feet and the Pascagoula Upper channel being deepened to 42 feet, were completed in 1999.

2. Alternative scenarios to be considered include the "No action" alternative and deepening and widening the federally authorized project to 42 feet deep in the Upper Pascagoula channel and 550 feet wide in the Gulf Entrance channel, respectively. In addition, an array of disposal options are also being evaluated for the new work as well as for the maintenance material including littoral zone disposal, beneficial use, disposal in the existing Pascagoula ODMDS, and disposal in existing open-water disposal sites.

3. Scoping: a. The Corps invites full public participation to promote open communication on the issues surrounding the proposal. All Federal, State, and local agencies, and other persons or organizations that have an interest are urged to participate in the NEPA scoping process. Public meetings will be held to help identify significant issues and to receive public input and comment.

b. The DEIS will analyze the potential social, economic, and environmental impacts to the local area resulting from construction of authorized improvements. Specifically, the following major issues will be analyzed in depth in the DSEIS: Hydrologic and hydraulic regimes, threatened and endangered species, essential fish habitat and other marine habitat, air quality, cultural resources, transportation systems, alternatives, secondary and cumulative impacts, socioeconomic impacts, environmental justice (effect on minorities and low-income groups) (Executive Order 12898), and protection of children (Executive Order 13045).

c. The Corps will serve as the lead Federal agency in the preparation of the DSEIS. It is anticipated that the following agencies will be invited and will accept cooperating agency status for the preparation of the DSEIS: U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service, National Marine Fisheries Service, Mississippi Department of Environmental Quality, Mississippi Department of Marine Resources, Jackson County Port Authority, City of Pascagoula, and State Historic Preservation Officer.

4. It is anticipated that the first scoping meeting will be held in the July 2006 time frame in the local area. Actual time and place for the meeting and subsequent meetings or workshops will be announced by the Corps by issuance of a public notice and/or notices in the local media.

5. It is anticipated that the DSEIS will be made available for public review in December 2006.
