NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* 10 CFR Part 19, "Notices, Instructions, and Reports to Workers: Inspection and Investigations".

2. *Current OMB approval number:* OMB No. 3150-0044.

3. *How often the collection is required:* As necessary in order that adequate and timely reports of radiation exposure be made to individuals involved in NRC-licensed activities.

4. *Who is required or asked to report:* Licensees authorized to receive, possess,

use, or transfer material licensed by the NRC.

5. *The number of annual respondents:* 4,650.

6. *The number of hours needed annually to complete the requirement or request:* 35,674 hours (4,553 reporting [approximately 0.98 hours per response] and 31,121 recordkeeping [approximately 6.7 hours per recordkeeper]).

7. *Abstract:* Title 10 of the Code of Federal Regulations, Part 19, requires licensees to advise workers on an annual basis of any radiation exposure they may have received as a result of NRC-licensed activities or when certain conditions are met. These conditions apply during termination of the worker's employment, at the request of a worker, former worker, or when the worker's employer (the NRC licensee) must report radiation exposure information on the worker to the NRC. Part 19 also establishes requirements for instructions by licensees to individuals participating in licensed activities and options available to these individuals in connection with Commission inspections of licensees to ascertain compliance with the provisions of the Atomic Energy Act of 1954, as amended, Title II of the Energy Reorganization Act of 1974, and regulations, orders and licenses thereunder regarding radiological working conditions. The worker should be informed of the radiation dose he or she receives because: (a) That information is needed by both a new employer and the individual when the employee changes jobs in the nuclear industry; (b) the individual needs to know the radiation dose received as a result of an accident or incident (if this dose is in excess of the 10 CFR Part 20 limits) so that he or she can seek counseling about future work involving radiation, medical attention, or both, as desired; and (c) since long-term exposure to radiation may be an adverse health factor, the individual needs to know whether the accumulated dose is being controlled within NRC limits. The worker also needs to know about health risks from occupational exposure to radioactive materials or radiation, precautions or procedures to minimize exposure, worker responsibilities and options to report any licensee conditions which may lead to or cause a violation of Commission regulations, and individual radiation exposure reports which are available to him.

Submit, by August 13, 2007, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to

properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Margaret A. Janney (T-5 F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, by telephone at 301-415-7245, or by Internet electronic mail to INFOCOLLECTS@NRC.GOV.

Dated at Rockville, Maryland, this 7th day of June 2007.

For the Nuclear Regulatory Commission,
Margaret A. Janney,
NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-243]

The Oregon State University; Notice of Acceptance for Docketing of the Application and Notice of Opportunity for Hearing Regarding Renewal of the Oregon State University Research Reactor Facility License No. R-106 for an Additional 20-Year Period

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering an application for the renewal of Facility License No. R-106, which authorizes the Oregon State University (the licensee) to operate the Oregon State University Research Reactor (OSTR) at a maximum steady-state thermal power of 1.1 megawatts (MW) thermal power. The renewed license would authorize the applicant to operate the OSTR for an additional 20 years beyond the period specified in the current license. The current license for the OSTR expired on August 15, 2006.

On October 5, 2004, as supplemented on August 8, 2005, May 24, 2006, November 10, 2006 and November 21, 2006, the Commission's staff received an application from the licensee filed pursuant to 10 CFR part 50.51(a), to renew Facility License No. R-106 for the OSTR. Because the license renewal application was filed in a timely manner in accordance with 10 CFR 2.109, the license will not be deemed to have expired until the license renewal application has been finally determined.

The Commission's staff has determined that the licensee has submitted sufficient information in accordance with 10 CFR 50.33 and 50.34 that the application is acceptable for docketing. The current Docket No. 50-243 for Facility License No. R-106, will be retained. The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application. Prior to a decision to renew the license, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

Within sixty (60) days after the date of publication of this **Federal Register** Notice, the applicant may file a request for a hearing, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene with respect to the renewal of the license. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland 20852 and is accessible from the Agency Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/readingrm/doc-collections/cfr>. Persons who do not have access to the NRC Web site or who encounter problems in accessing the documents located in the Electronic Reading Room should contact the NRC's PDR reference staff at 1-800-397-4209, or by e-mail at pdr@nrc.gov. If a request for a hearing or a petition for leave to intervene is filed within the 60-day period, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board
