

Vessel operators must bring proof of identification.

Workshop Objectives

The protected species safe handling, release, and identification workshops are designed to teach longline and gillnet fishermen the required techniques for the safe handling and release of entangled and/or hooked protected species, such as sea turtles, marine mammals, and smalltooth sawfish. Identification of protected species will also be taught at these workshops in an effort to improve reporting. Additionally, individuals attending these workshops will gain a better understanding of the requirements for participating in these fisheries. The overall goal for these workshops is to provide participants the skills needed to reduce the mortality of protected species, which may prevent additional regulations on these fisheries in the future.

Grandfathered Permit Holders

Participants in the industry-sponsored workshops on safe handling and release of sea turtles that were held in Orlando, FL (April 8, 2005) and in New Orleans, LA (June 27, 2005) were issued a NOAA workshop certificate in December 2006 that is valid for three years. Grandfathered permit holders must include a copy of this certificate when renewing limited access shark and limited access swordfish permits each year. Failure to provide a valid NOAA workshop certificate may result in a permit denial.

SUPPLEMENTARY INFORMATION:

Background

Section 9 (a) and (b) of the National Environmental Education Act of 1990 (Pub. L. 101-619) mandates a National Environmental Education Advisory Council. The Advisory Council provides the Administrator with advice and recommendations on EPA implementation of the National Environmental Education Act. In general, the Act is designed to increase public understanding of environmental issues and problems, and to improve the training of environmental education professionals. EPA will achieve these goals, in part, by awarding grants and/or establishing partnerships with other Federal agencies, state and local education and natural resource agencies, not-for-profit organizations, universities, and the private sector to encourage and support environmental education and training programs. The Council is also responsible for preparing a national biennial report to Congress that will describe and assess the extent and quality of environmental education, discuss major obstacles to improving environmental education, and identify the skill, education, and training needs for environmental professionals.

The National Environmental Education Act requires that the Council be comprised of eleven (11) members appointed by the Administrator of EPA. Members represent a balance of perspectives, professional qualifications, and experience. The Act specifies that members must represent the following sectors: primary and secondary education (one of whom shall be a classroom teacher)—two members; colleges and universities—two members; business and industry—two members; non profit organizations involved in environmental education—two members; state departments of education and natural resources—one member each; senior Americans—one member. Members are chosen to represent various geographic regions of the country, and the Council strives for a diverse representation. The professional backgrounds of Council members should include education, science, policy, or other appropriate disciplines. Each member of the Council shall hold office for a one (1) to three (3) year period. Members are expected
