

to the primary producers in the aquatic plant community and the subsequent impacts to community structure. The monitoring program design was based on a population of 1,172 watersheds whose streams were identified as highly vulnerable to atrazine exposure based on factors such as atrazine use intensity in corn and sorghum production and run-off vulnerability. A sub-set of 40 sites was selected for monitoring using a stratified, random statistical survey design. Streams were monitored for a minimum of two years with samples collected at least once every four days. Data from each stream were evaluated on a yearly basis to determine if atrazine concentrations were detected at sufficient levels over sufficiently long time durations to exceed the exposure threshold of concern. Based on the sampling design, the results from the streams in the 40 watersheds allow statistically-based inferences to the larger population of 1,172 watersheds vulnerable to atrazine runoff.

Key questions to be addressed by the FIFRA SAP at this public meeting are as follows:

1. Based on available experimental microcosm and mesocosm studies and ecosystem response models were the relationships between atrazine exposure profiles and aquatic community responses determined in a reasonable and transparent manner to establish thresholds of concern for atrazine?

2. Based on the monitoring design, is the approach to estimating the extent of watersheds in corn and sorghum producing areas that exceed atrazine thresholds of concern for aquatic community effects appropriate?

3. Based on results of the monitoring study, are the hypotheses and related methods and data sets being employed to identify potential watershed attributes associated with higher atrazine exposures appropriate?

C. FIFRA SAP Documents and Meeting Minutes

EPA's background paper, related supporting materials, charge/questions to the FIFRA SAP, FIFRA SAP composition (i.e., members and ad hoc members for this meeting), and the meeting agenda will be available by mid-November 2007. In addition, the Agency may provide additional background documents as the materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available electronically, at <http://www.regulations.gov> and the FIFRA SAP homepage at <http://www.epa.gov/scipoly/sap>.

The FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes will be posted on the FIFRA SAP website or may be obtained from the OPP Regulatory Public Docket at <http://www.regulations.gov>.

Pesticide Registration Review; New Dockets Opened for Review and Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established registration review dockets for the pesticides listed in the table in Unit III.A. With this document, EPA is opening the public comment period for these registration reviews. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. This document also announces the Agency's intent not to open a registration review docket for liquid nitrogen. This pesticide does not currently have any actively registered pesticide products and is not, therefore, scheduled for review under the registration review program.

DATES: Comments must be received on or before November 19, 2007.

ADDRESSES: Submit your comments identified by the docket identification (ID) number for the specific pesticide of interest provided in the table in Unit III.A., by one of the following methods:

• **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

• **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
