Title: Transportation Conformity Determinations for Federally Funded and Approved Transportation Plans, Programs and Projects (Renewal).

ICR number: EPA ICR No. 2130.03, OMB Control No. 2060-0561.

ICR status: This ICR is scheduled to expire on December 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR Part 9.

Abstract: Transportation conformity is required under Clean Air Act section 176(c) (42 U.S.C. 7506(c)) to ensure that federally supported transportation activities are consistent with ("conform to") the purpose of the state air quality implementation plan (SIP). Transportation activities include transportation plans, transportation improvement programs (TIPs), and federally funded or approved highway or transit projects. Conformity to the purpose of the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS or "standards").

Transportation conformity applies, under EPA's conformity regulations at 40 CFR part 93, subpart A, to areas that are designated nonattainment and those redesignated to attainment after 1990 ("maintenance areas" with plans developed under Clean Air Act section 175A) for the following transportation-related criteria pollutants: Ozone, particulate matter (PM_{2.5} and PM₁₀), carbon monoxide (CO), and nitrogen dioxide (NO₂). The EPA published the original transportation conformity rule

on November 24, 1993 (58 FR 62188), and subsequently published several revisions. EPA develops the conformity regulations in coordination with the Federal Highway Administration and the Federal Transit Administration.

Transportation conformity determinations are required before federal approval or funding is given to certain types of transportation planning documents as well as non-exempt highway and transit projects.¹

EPA considered the following in renewing the existing ICR:

- Burden estimates for transportation conformity determinations in current 8-hour ozone and PM_{2.5} nonattainment and maintenance areas, which made up EPA ICR 2130.02;

- Burden estimates for conformity determinations for CO, NO₂, and PM₁₀, which were previously included in the Department of Transportation's (DOT) ICR for Metropolitan and State-wide Transportation Planning (OMB Control Number 2132-0529);²

- Efficiencies associated with the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), which was signed into law on August 10, 2005;

- Burden estimates for hypothetical areas that may be designated nonattainment for the revised 24-hour PM_{2.5} standard, which EPA promulgated on October 17, 2006 (71 FR 61144);

- Differences in conformity resource needs in large and small metropolitan areas and isolated rural areas; and

- Additional burden associated with EPA's adequacy review process for submitted SIP motor vehicle emissions budgets that are to be used in conformity determinations.

This ICR does not include burden associated with the general development of transportation planning and air quality planning documents for meeting other federal requirements.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5 hours per response.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting,

¹ Some projects are exempt from all or certain conformity requirements, see 40 CFR 93.126, 93.217, and 93.128.

² EPA, in consultation with DOT, concluded that it would be advantageous to join transportation conformity burden estimates for all pollutants into one ICR.

validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States and local governments.

Estimated Number of Respondents: 177.

Frequency of Response: Occasionally.

Estimated Total Annual Hour Burden: 52,304.

Estimated Total Annual Cost:

\$2,873,060, which includes no capital or O&M costs.

Changes in the Estimates: There is an increase of 22,890 hours in the total estimated state and local respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects the following adjustments and program changes:

- Program change associated with transfer of DOT ICR (OMB #2132-0529) to EPA ICR 2130.03.

- Adjustments associated with the implementation of transportation conformity revisions from SAFETEA-LU.

- Reduced burden from the previous ICR, which included substantial start-up burden for areas that had never done transportation conformity prior to PM_{2.5} and 8-hour ozone nonattainment designations. These areas now have experience with conformity.

- Other factors that have been updated since the existing ICR was approved.

Dated: October 8, 2007.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
