Only the principal environmental regulatory agency within each State (generally, where delegated authorities for Federal environmental regulations exist) is eligible to receive these grants.

DATES: State environmental regulatory agencies will have until January 3, 2008 to respond with a pre-proposal, budget, and project summary. The environmental regulatory agencies from the fifty (50) States; Washington, DC, and four (4) territories were notified of the solicitation’s availability by fax and email transmittals on November 15, 2007.

EPA will acknowledge all responses it receives to this notice.

SUPPLEMENTARY INFORMATION: The U.S. Environmental Protection Agency (EPA) is soliciting pre-proposals for an assistance agreement program (the “State Innovation Grant Program”) in an effort to support innovation by State environmental regulatory agencies. In April 2002, EPA issued its plan for future innovation efforts, published as *Innovating for Better Environmental Result: A Strategy to Guide the Next Generation of Innovation at EPA* (EPA 100-R-02-002; <http://www.epa.gov/innovation/pdf/strategy.pdf>). This assistance agreement program strengthens EPA’s partnership with the States by supporting state innovation compatible with EPA’s *Innovation Strategy*. EPA wants to encourage states to build on previous experience (theirs and others) to undertake strategic innovation projects that promote larger-scale models for “next generation” environmental protection and promise better environmental outcomes and other beneficial results. EPA is interested in funding projects that: (i) Go beyond a single facility experiment and provide change that is “systems-oriented;” (ii) provide better results from a program, process, or sector-wide innovation; and (iii) promote integrated (multi-media) environmental management with a high potential for

transfer to other states, U.S. territories, and tribes.

“Innovation in Permitting” is again the theme for the 2008 solicitation. Under this theme, EPA is interested in pre-proposals that:

(a) Support the development of state Environmental Results Programs (ERPs);

(b) Implement National Environmental Performance Track (PT) or similar performance-based environmental leadership programs by states, particularly including the development and implementation of incentives; or

(c) Involve the application of Environmental Management Systems (EMS), including those that explore the relationship of EMS to permitting, or otherwise support integrated or multimedia strategies.

EPA continues to interpret “innovation in permitting” broadly to include permitting programs, pesticide licensing programs, and other alternatives or supplements to permitting programs. EPA is interested in creative approaches for both: (1) Achieving mandatory federal and state standards; and (2) encouraging performance and addressing environmental issues above and beyond minimum requirements. EPA’s focus on a small number of topics within this general subject area effectively concentrates the limited resources available for greater strategic impact. EPA may contemplate a very limited number of projects not linked to these focus areas, but otherwise related to the general theme of innovation in permitting, in particular as they address EPA regional and state environmental permitting priorities.

This solicitation begins the sixth State Innovation Grant competition. Of the 35 projects that have been awarded in the prior rounds seventeen (17) were provided for development of environmental results programs, eight (8) were to enhance performance-based environmental leadership programs, eight (8) were related to environmental management systems and permitting, two (2) were for watershed-based permitting, and one (1) was for an information technology innovation for the application of geographic information systems (GIS) and a web-based portal to a permitting process. For information on prior State Innovation Grant Program solicitations and awards, please see the EPA State Innovation Grants Web site at <http://www.epa.gov/innovation/stategrants>.

Dated: November 6, 2007.

Director, Office of Environmental Policy Innovation.
