SUPPLEMENTARY INFORMATION:**I. Summary of Information About the Integrated Risk Information System (IRIS)**

IRIS is a database that contains potential adverse human health effects information that may result from chronic (or lifetime) exposure to specific chemical substances found in the environment. The database (available on the Internet at <http://www.epa.gov/iris>) contains qualitative and quantitative health effects information for more than 500 chemical substances that may be used to support the first two steps (hazard identification and dose-

response evaluation) of a risk assessment process. When supported by available data, the database provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic health effects, and oral slope factors and inhalation unit risks for carcinogenic effects. Combined with specific exposure information, government and private entities can use IRIS data to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.

II. Meeting Information

Members of the public may attend the meeting as observers, and there will be a limited time for oral comments from the public. Please let Versar, Inc. know if you wish to make comments during the meeting by registering on the Web site at <http://epa.versar.com/2hexanone/> and indicating your intent to make oral comments. Space is limited, and reservations will be accepted on a first-come, first-served basis.

Fenamiphos; Notice of Receipt of Request to Voluntarily Cancel Certain Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of a request by a registrant to voluntarily cancel its registrations for all products containing the pesticide fenamiphos. This notice announces receipt by EPA of a request from the registrant Bayer CropScience to cancel the remaining fenamiphos product registrations. The request would terminate the last fenamiphos products registered for use in the United States. The last remaining fenamiphos products registered under FIFRA Section 3 were cancelled on May 31, 2007 as stipulated in a **Federal Register** notice issued on December 10, 2003

(FRL-7332-5). However, several FIFRA 24(c) Special Local Needs registrations (for nematode and banana root borer control) have not gone through the voluntary cancellation process. Bayer CropScience, the registrant for all of the active FIFRA 24(c) product registrations, has requested cancellation of all fenamiphos Special Local Needs registrations associated with the previously cancelled Section 3 fenamiphos products. EPA intends to grant this request at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the request, or unless the registrant withdraws their request within this period. Upon acceptance of this request, any sale, distribution, or use of products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or May 23, 2008.

ADDRESSES: Submit your comments and your withdrawal request, identified by docket identification (ID) number EPA-HQ-OPP-2008-0303, by one of the following methods:
