

regarding compliance with the implementing regulations. This request is for approval of reporting and recordkeeping requirements contained in the attached proposed regulations related to the TEACH Grant administrative requirements for the Title IV, HEA programs. The information collection requirements in these proposed regulations are necessary to determine eligibility to receive program benefits and to prevent fraud and abuse of program funds.

Additional Information: The U.S. Department of Education (the Department) requests that OMB grant an emergency clearance of the proposed regulations governing the Teacher Education Assistance for College and Higher Education (TEACH) Grant Program. Sections 420L through 420O of the Higher Education Act of 1965, as amended, (the HEA) provides for TEACH Grants to eligible students at eligible and participating institutions of higher education. The TEACH Grant Program was established under the HEA by the College Cost Reduction and Access Act of 2007 (the CCRAA). In accordance with section 420O of the CCRAA, the effective date for the TEACH Grant Program is July 1, 2008. The Department is requesting an emergency clearance of these TEACH Grant regulations because the regular clearance process would not enable us to make an OMB-approved TEACH Grant available to participants by the statutory effective date for the TEACH Grant Program. The Department requests emergency clearance of the proposed regulations by June 12, 2008, in order to obtain an OMB Control Number to be used in the TEACH Grant Final Regulations which are being prepared for submission.

Office of International Regimes and Agreements; Proposed Subsequent Arrangement

AGENCY: Department of Energy.

ACTION: Notice of proposed subsequent arrangement.

SUMMARY: This notice is being issued under the authority of Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160). The Department is providing notice of a proposed "subsequent arrangement" under the Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States and Argentina.

This subsequent arrangement requests to downblend material subject to an earlier subsequent arrangement—published in the **Federal Register** July 9, 2004 (69 FR 41460)—to a different level than previously approved. Under the 2004 subsequent arrangement, Comision Nacional de Energia Atomica (CNEA) was approved to downblend material from 89.79% enriched into low-enriched uranium (LEU). Under a contract with DOE's Global Threat Reduction Initiative program, CNEA has submitted the attached request to downblend 304 g of that material to 58% weight of isotope U²³⁵ rather than to LEU as originally approved. The material will be fabricated into test plates in Argentina and sent to Idaho National Laboratory for testing and irradiation. The material will remain in the United States after irradiation.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, we have determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Richard S. Goorevich,

Director, Office of International Regimes and Agreements.
