

data request to the state of California for permit or license-holder information. Using this information, NMFS will mail MMAP Authorization Certificates, marine mammal injury/mortality reporting forms, and other program information to each permit or license-holder. Fishermen who participate in an integrated Category I or II state fishery do not need to take any additional action to register under the MMAP, as long as they hold a valid state fishing permit or license for the affected fishery. However, fishermen who participate in Category I or II state and/or Federal fisheries not yet integrated with the MMAP registration system (i.e., fisheries for which no Federal or state permits are required) must contact the NMFS, Southwest Regional Office, Sustainable Fisheries Division (see **FOR FURTHER INFORMATION CONTACT**), in order to register and receive an MMAP Authorization Certificate. If a fisherman participating in a Category I or II fishery, who expects to receive automatic registration, does not receive an Authorization Certificate by January 1 of each calendar year hereafter, the fisherman should contact NMFS (see **FOR FURTHER INFORMATION CONTACT**) to inquire about the status of his/her registration. Alternatively, he/she may apply for registration directly, following the procedures in 50 CFR 229.4(b). In any case, every fisherman fishing in a Category I or II fishery must have an Authorization Certificate.

NMFS will work with the permit-issuing agencies in each state to identify and attempt to limit mailing of Authorization Certificates to only those participants in Category I and II fisheries. Some permit systems, however, do not allow identification of fishermen using specific gear types in a way that matches the fishery designation referenced in the LOF. In cases where NMFS or the state permit-issuing agency cannot confidently determine which specific fishery identified in the LOF each fisherman participates in, based on the permit or license information, NMFS may inadvertently issue Authorization Certificates to fishermen participating in Category III fisheries. This approach, which may be confusing to Category III fishermen who are not required to be registered under the MMAP, is necessary to ensure that fishermen who must register with the MMAP are not unintentionally excluded from notification.
