B. What is the Agency's Authority for Taking this Action?

FIFRA Section 3(g) and 40 CFR 155.58(c) provide authority for this action. A registration review decision is the Agency's determination whether a pesticide meets, or does not meet the standard for registration in FIFRA. Proposed registration review decisions were posted to the docket for the above cases and public comments were requested. During the respective 60 day comment periods, no public comments were received for the Chitin/Chitosan, Farnesol/Nerolidol or Nosema locustae cases. The final decisions that are subject to this notice continue to be supported by the rationales included in the proposed registration review decisions for each case. The documents in the subject registration review dockets describe the Agency's rationale for issuing these final decisions for the Chitin/Chitosan, Farnesol/Nerolidol or Nosema locustae cases. No risk mitigation measures are required or specified in the final decisions for these registration review cases and no labeling changes are required as a result of these final decisions.

II. Background

A. What Action is the Agency Taking?

This notice opens a 60-day public comment period on the subject proposed registration review decision. The Agency is proposing registration a review decision for the pesticide case shown in the following Table.

TABLE 1.—REGISTRATION REVIEW DOCKETS – PROPOSED FINAL DECISIONS

Registration Review Case Name and Number	Pesticide Docket ID Number	Regulatory Contact name, Phone Number, E-mail Address
L-Latic Acid; Case 6062	EPA-HQ-OPP-2008-0383	Andrew Bryceland; (703) 305-6928; bryceland.andrew@epa.gov

The docket for registration review of this pesticide case includes earlier documents related to the registration review of the subject case. For example, the review opened with the posting of a Summary Document, containing a Preliminary Work Plan (PWP), for public comment. Because no comments were received, and because the Agency required no further risk assessments to complete registration review of this case, the Final Work Plan and Proposed Decision were combined into a single document. The documents in the initial

docket described the Agency's rationale for not conducting new risk assessments for the registration review of L-Latic Acid. This proposed registration review decision now included in the docket continue to be supported by those rationales included in documents in the initial docket. Following public comment, the Agency will issue a final registration review decision for this case.

The registration review program is being conducted under congressionally mandated time frames, and EPA

recognizes the need both to make timely decisions and to involve the public. Section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1996 required EPA to establish by regulation procedures for reviewing pesticide registrations, originally with a goal of reviewing each pesticide's registration every 15 years to ensure that a pesticide continues to meet the FIFRA standard for registration. The Agency's final rule to implement this program was issued in August 2006 and became effective in

October 2006 and appears at 40 CFR 155.40. The Pesticide Registration Improvement Act of 2003 ("PRIA") was amended and extended in September 2007. FIFRA as amended by PRIA in 2007 requires EPA to complete registration review decisions by October 1, 2022 for all pesticides registered as of October 1, 2007. The registration review final rule provides for a minimum 60-day public comment period for all proposed registration review decisions.

This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for L-Lactic Acid. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments. The Agency will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and www.regulations.gov. The final registration review decisions will explain the effect that any comments have had on the decisions.

Background on the registration review program is provided at: http://www.epa.gov/oppsrrd1/registration_review/. Quick links to earlier documents related to the registration review of this pesticide are provided at: http://www.epa.gov/oppsrrd1/registration_review/reg_review_status.htm/.

B. What is the Agency's Authority for Taking this Action?
