Electronic Tariff Filings; Notice of Posting of Information and Establishment of RSS Feed

February 23, 2009.

In Order No. 714,¹ the Commission adopted regulations requiring that, as of April 1, 2010, tariff and tariff related filings must be made electronically according to a set of protocols and standards. A Web site (<http://www.ferc.gov/docs-filing/etariff.asp>) and an e-mail address (etariff@ferc.gov) have been established to provide information, and respond to questions, about the protocols and standards.

The information on the Web site needs to be updated and revised from time to time. Answers to the questions received through e-mail also may be of value to software providers and companies other than the requester. In order to ensure that all vendors and providers have access to this information, the questions and answers will be posted on the Web site under the "Staff's Response to Discussion Questions" link. Similar questions may be grouped together with a single response.

The following revised documents are being posted: Preliminary FERC eTariff Rules Table, Type of Filing, Attachment Reference Code, and Staff's Response to

Discussion Questions. The Staff's Response to Discussion Questions has been revised to organize better the previous information posted with respect to the December 3, 2008 technical conference and to add additional information. In addition, the dates on which each item is revised will be listed so that viewers can more easily determine the new items that have been added as the document is revised.

Because these documents will be updated and revised on a regular basis, a Secretary's Notice will not be published for every change made on the eTariff Web site. Instead, an RSS feed has been established for the Web site so that software companies and vendors can be alerted when information on the site is revised. Anyone may subscribe to the RSS feed which is located at <http://www.ferc.gov/xml/etariff.xml>.

For further information, please contact Keith Pierce at 202-502-8525 or by sending an e-mail to ETariff@ferc.gov.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP04-47-001 and CP05-396-001]

Sabine Pass LNG, L.P.; Notice of Availability of the Environmental Assessment for the Proposed Sabine Pass LNG Export Project

February 23, 2009.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the liquefied natural gas (LNG) facilities proposed by Sabine Pass LNG, L.P. (Sabine Pass) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

In order to operate its facility for the purpose of exporting LNG, Sabine Pass is proposing to modify four 24-inch diameter check valves located on Transfer Arms A and D on the East and West Jetty Platforms. The modifications

to the check valves would allow LNG to flow in the direction for ship loading from the LNG Storage Tanks.

The terminal operations currently utilize the Phase I facilities under Docket CP04-47-000. Until the Phase II facilities under Docket CP05-396-000 are fully operational, LNG export operations would be limited to one transfer arm at a maximum rate of 6,000 cubic meters per hour (m³/hr). Once the Phase II facilities are fully operational, two transfer arms on one Jetty would be used for exporting LNG at a loading rate of 12,000 m³/hr.

The terminal would be able to operate in a dual import/export capacity or solely as an import terminal depending on market conditions. In a dual operational capacity that utilizes Phase I and II facilities, one jetty would be dedicated for loading and the other for unloading. However, the valve modifications and unloading arms would not be permanent and could either be returned to full unloading or kept in-place to allow for dual import/export functionality.

No other modifications to equipment, plant processes, or safety systems would be required to facilitate export operations. Additionally, no new environmental resources and no new stakeholders would be affected.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Copies of the EA have been mailed to Federal, State, and local agencies; public interest groups; interested individuals and affected landowners; newspapers and libraries; and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below.

You can make a difference by providing us with your specific comments or concerns about the Sabine Export Project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that your comments are timely and properly recorded, please send in your comments so that they will be received in Washington, DC on or before March 23, 2009.
