

with strategies aligned with current and projected aviation safety issues. A major step in the development of the NASSP is the collection and analysis of worldwide safety issues.

II. Method of Collection

Aviation stakeholders will be contacted via electronic means and asked to respond by filling out a questionnaire. They will have the option of printing it and filling it out manually and then returning it via traditional mail, filling it out electronically and returning via email, or visiting a Web site where the questionnaire can be filled out online. The information will be collected by the JPDO Aviation Safety Working Group's Strategic Planning Subcommittee and used to determine the efficacy of the Aviation Safety Strategic Plan.

III. Data

Title: Biennial NextGen Safety Issue Survey.

OMB Number: 2700-XXXX.

Type of Review: New Collection.

Affected Public: Business or other for-profit.

Estimated Number of Respondents: 100.

Estimated Number of Responses per Respondent: 1.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 200 hours.

Estimated Annual Cost for Respondents: \$0.00.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Lori Parker,

NASA Clearance Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-400; NRC-2010-0020]

Carolina Power & Light Company Shearon Harris Nuclear Power Plant, Unit 1 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption, pursuant to Title 10 of the Code of Federal Regulations (10 CFR) Section 73.5, “Specific Exemptions,” from the implementation date for certain new requirements of 10 CFR Part 73, “Physical Protection of Plants and Materials,” for Renewed Facility Operating License No. NPF-63, issued to Carolina Power & Light Company (the licensee), now doing business as Progress Energy Carolinas, Inc. (PEC), for operation of the Shearon Harris Nuclear Power Plant, Unit 1 (HNP), located in New Hill, North Carolina.

In accordance with 10 CFR 51.21, “Criteria for and identification of licensing and regulatory actions requiring environmental assessments,” the NRC prepared an environmental assessment documenting its finding. The NRC concluded that the proposed actions will have no significant environmental impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt HNP from the required implementation date of March 31, 2010, for several new requirements of 10 CFR Part 73. Specifically, HNP would be granted an exemption from being in full compliance with certain new requirements contained in 10 CFR 73.55, “Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage,” by the March 31, 2010, deadline. PEC has proposed an alternate full compliance implementation date of July 30, 2010, for one requirement, and December 15, 2010, for two other requirements, which is approximately four months and eight and a half months, respectively, beyond the date required by 10 CFR Part 73. The proposed action, an extension of the schedule for completion of certain actions required by the revised 10 CFR
