Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Revised Groundwater Protection Standards, Western Nuclear, Inc., Jeffrey City, WY

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Richard Chang, Project Manager, Special Projects Branch, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuing a license amendment to Materials License No. SUA-56, held by Western Nuclear, Inc. (WNI), to authorize revised groundwater protection standards for its facility near Jeffrey City, Wyoming. On June 19, 1981, WNI announced that the facility would be placed on standby because of a diminishing demand for the ore and because of depressed uranium prices. The facility remained on standby until 1986 when the NRC staff amended the license to terminate the use of the tailings impoundments for disposal, and WNI was required to submit a tailings reclamation plan. On December 1, 2008, as supplemented by a February 7, 2009, submittal, WNI submitted a license amendment request for revised groundwater protection standards. On
