

Harbor area for the Half Moon Bay Independence Day Firework and recorded five harbor seals and 45 California sea lions. One California sea lion that appeared ill was reported to the Marine Mammal Stranding Center. Observers recall that the post-event monitoring on July 5 revealed that no marine mammals were injured or killed; however, the records of post-event monitoring were lost.

Pre-event monitoring for the Pacific Grove Feast of Lanterns Fireworks display consisted of enumerating all marine mammals within 400 meters of the fireworks launch site (survey area). On July 24, observers reported the presence of seven harbor seals and four California sea lions within the survey area. A post-event monitoring survey found that no marine mammals had been injured or killed.

Finally, pre-event monitoring of the Monte Foundation Fireworks Display on October 2 found approximately 34 California sea lions, approximately 10 harbor seals, and two bottlenose dolphins within the survey area. On October 4, the observers reported that there were no injured or dead marine mammals.

In summary, MBNMS conducted activities as described in the regulations, implemented the required mitigation measures, and conducted the required monitoring. The total number of potentially harassed California sea lions (83) and harbor seals (22) for all fireworks displays was well below the authorized limits as stated in the final rule (71 FR 40928, July 19, 2006).

No injuries or fatalities to marine mammals were reported as resulting from any of the events. Hence, these monitoring results support NMFS' initial findings that fireworks display will result in no more than Level B behavioral harassment of small numbers of California sea lions and harbor seals and that the effects will be limited to short term behavioral changes, including temporary abandonment of haul-out areas to avoid the sights and sounds of commercial fireworks.

Authorization

NMFS has issued an LOA to MBNMS authorizing the Level B harassment of marine mammals incidental to the coastal commercial fireworks display within the Sanctuary. Issuance of this LOA is based on the results of the MBNMS 2009 monitoring report which verify that the total number of potentially harassed sea lions and harbor seals was well below the authorized limits as stated in the final rule (71 FR 40928, July 19, 2006). Based on these findings and the information

discussed in the preamble to the final rule, the activities described under this LOA will have a negligible impact on marine mammal stocks and will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses. No mortality or injury of affected species is anticipated.

Dated: June 14, 2010.

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.
