National Institute of Food and Agriculture

Title: NIFA Current Research Information System (CRIS).
OMB Control Number: 0524-0042.
Summary of Collection: The United States Department of Agriculture (USDA), National Institute of Food and Agriculture (NIFA) administers several competitive, peer-reviewed research, education and extension programs, under which awards of a high-priority are made. These programs are authorized pursuant to the authorities contained in the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101); the Smith-Lever Act; and other legislative authorities. The Current Research Information System (CRIS) is USDA's documentation and reporting system for ongoing research and education activities in agriculture, food science, human nutrition, and forestry. CRIS operates administratively under NIFA, but is a cooperative endeavor whereby information is collected on a project-by-project basis from many participant organizations, both federal and non-federal. Information is received from USDA agencies, State Agricultural Experiment Stations, the state land-grant colleges and universities, the institutions of 1890, state schools of forestry, cooperating schools of veterinary medicine, USDA grant recipients, and other cooperating institutions. The information is collected primarily via the Internet using CRIS Web forms.

Need and Use of the Information: The collected information is necessary in order to provide descriptive information regarding individual research activities and integrated activities, to document expenditures and staff support for the activities, and to monitor the progress and impact of such activities. The information obtained through the collection process for CRIS furnishes unique data that is not available from any other source. Interruption in the collection process, or failure to collect this information, would severely compromise one of NIFA's primary functions stated in the agency's strategic plan of "providing program leadership to identify, develop, and manage programs to support university-based and other institutional research."

SUPPLEMENTARY INFORMATION:

Title: Pathogen Reduction/HACCP Systems.

OMB Number: 0583-0103.

Expiration Date of Approval: 12/31/2010.

Type of Request: Revision of a currently approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*). These statutes provide that FSIS is to protect the public by verifying that meat and poultry products are safe, wholesome, not adulterated, and properly labeled and packaged.

FSIS is planning to request a revision of an approved information collection addressing paperwork and recordkeeping requirements regarding Pathogen Reduction and HACCP Systems because OMB approval will expire on December 31, 2010, and to include the use of video recordkeeping. The Agency is revising the Pathogen Reduction/HACCP systems information collection based on its most recent establishment data. In addition, FSIS is adding information concerning the use of video recordkeeping for HACCP records and Sanitation Standard Operating Systems (SOPs) records. Approximately one percent of meat and poultry establishments are using video records, which accounts for about one percent of the burden hours in this information collection.

FSIS has established requirements applicable to meat and poultry establishments designed to reduce the occurrence and numbers of pathogenic microorganisms on meat and poultry products, reduce the incidence of foodborne illness associated with the consumption of those products, and provide a framework for modernization of the meat and poultry inspection system. The regulations (1) Require that each establishment develop, implement, and revise, as needed, written Sanitation Standard Operating Procedures (Sanitation SOPs) (9 CFR
