SUPPLEMENTARY INFORMATION:

I. Background

On September 12, 1997, the Convention on Supplementary Compensation for Nuclear Damage was adopted by a diplomatic conference convened by the International Atomic Energy Agency ("IAEA").¹ The CSC provides the basis for a global nuclear liability regime. Such a regime is an essential element of the infrastructure necessary to support the expanded use of nuclear power around the world to meet the challenges of climate change, energy security, and economic growth. The CSC provides consistent rules for dealing with legal liability resulting from a nuclear incident and ensures prompt availability of meaningful compensation for the nuclear damage resulting from any such incident. A major feature of the CSC is the creation of an "international supplementary fund," which provides an additional tier of compensation not otherwise available under a State's national law and to which each Party to the Convention ("Contracting Party") contributes in the event of certain nuclear incidents.

In the event of a nuclear incident, the CSC provides a two-tiered compensation system based on: (1) A Contracting Party's national law; and (2) the international supplementary fund. The first tier is provided by funds available under the laws of the State where the nuclear installation involved is located, or under whose authority the installation is operated ("Installation State"). The first tier amount is set at a minimum of 300 million Special Drawing Rights ("SDRs").² In the event that the first tier is inadequate to compensate all nuclear damage, a second tier would be provided via the international supplementary fund to which all Contracting Parties would contribute, including the Installation

¹ The full text of the Convention on Supplementary Compensation for Nuclear Damage is available at <http://www.iaea.org/Publication/Documents/Infircs/1998/infirc567.shtml>. A detailed interpretation of the CSC and its provisions is contained in "The 1997 Vienna Convention on Civil Liability for Nuclear Damage and the 1997 Convention on Supplementary Compensation for Nuclear Damage—Explanatory Texts," International Atomic Energy Agency (IAEA) ("Explanatory Texts"). International Law Series No. 3 (2007). The Explanatory Texts is available at http://www-pub.iaea.org/MTCD/publications/PDF/Pub1279_web.pdf.

² SDR is the unit of account defined by the International Monetary Fund ("IMF") and used by the IMF for its own operations and transactions. As of May 2010, 1 SDR equaled about \$1.50 dollars; therefore, 300 million SDRs would equal roughly \$450 million dollars.
