## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

#### 49 CFR Part 541

[Docket No. NHTSA-2009-0085]

#### Final Theft Data; Motor Vehicle Theft Prevention Standard

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Publication of 2007 final theft data; Correction.

**SUMMARY:** The National Highway Traffic Safety Administration (NHTSA) published in the **Federal Register** of March 10, 2010, a document on thefts of model year (MY) 2007 passenger motor vehicles that occurred in calendar year (CY) 2007. The document was published with several errors. In that publication, a vehicle line was omitted from the theft rate data which affected the overall theft rate calculation, the number of vehicle lines above the 1990/1991 median theft rate and the vehicle rankings. Additionally, vehicle line names and production numbers were listed incorrectly. The republishing of this document in its entirety corrects those errors.

This document publishes the final data on thefts of model year (MY) 2007 passenger motor vehicles that occurred in calendar year (CY) 2007. The final 2007 theft data indicated a decrease in the vehicle theft rate experienced in CY/MY 2007. The final theft rate for MY 2007 passenger vehicles stolen in calendar year 2007 is 1.85 thefts per thousand vehicles, a decrease of 11.1

percent from the rate of 2.08 thefts per thousand in 2006.

**FOR FURTHER INFORMATION CONTACT:** Ms. Deborah Mazyck, Office of International Policy, Fuel Economy and Consumer Programs, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. Ms. Mazyck's telephone number is (202) 366-0846. Her fax number is (202) 493-2990.

**SUPPLEMENTARY INFORMATION:** This final notice revises the **Federal Register** notice published on March 10, 2010 (75 FR 11005) which omitted a vehicle line from the theft rate list. This omission affected the theft rate calculation, the number of vehicle lines above the 1990/1991 median theft rate and the vehicle rankings. Additionally, vehicle line names and production numbers erroneously were not listed correctly. The document has been revised and is reprinted below in its entirety.

NHTSA administers a program for reducing motor vehicle theft. The central feature of this program is the Federal Motor Vehicle Theft Prevention Standard, 49 CFR part 541. The standard specifies performance requirements for inscribing and affixing vehicle identification numbers (VINs) onto certain major original equipment and replacement parts of high-theft lines of passenger motor vehicles.

The agency is required by 49 U.S.C. 33104(b)(4) to periodically obtain, from the most reliable source, accurate and timely theft data and publish the data for review and comment. To fulfill this statutory mandate, NHTSA has published theft data annually beginning with MYs 1983/84. Continuing to fulfill the § 33104(b)(4) mandate, this document reports the final theft data for CY 2007, the most recent calendar year for which data are available.

In calculating the 2007 theft rates, NHTSA followed the same procedures it used in calculating the MY 2006 theft rates. (For 2006 theft data calculations, see 73 FR 60633, October 14, 2008). As in all previous reports, NHTSA's data were based on information provided to NHTSA by the National Crime Information Center (NCIC) of the

Federal Bureau of Investigation. The NCIC is a government system that receives vehicle theft information from nearly 23,000 criminal justice agencies and other law enforcement authorities throughout the United States. The NCIC data also include reported thefts of self-insured and uninsured vehicles, not all of which are reported to other data sources.

The 2007 theft rate for each vehicle line was calculated by dividing the number of reported thefts of MY 2007 vehicles of that line stolen during calendar year 2007 by the total number of vehicles in that line manufactured for MY 2007, as reported to the Environmental Protection Agency (EPA).

The final 2007 theft data show a decrease in the vehicle theft rate when compared to the theft rate experienced in CY/MY 2006. The final theft rate for MY 2007 passenger vehicles stolen in calendar year 2007 decreased to 1.85 thefts per thousand vehicles produced, a decrease of 11.1 percent from the rate of 2.08 thefts per thousand vehicles experienced by MY 2006 vehicles in CY 2006. The data has shown an overall decreasing trend in theft rates since CY 1993, with periods of increase from one year to the next.

For MY 2007 vehicles, out of a total of 206 vehicle lines, 15 lines had a theft rate higher than 3.5826 per thousand vehicles, the established median theft rate for MYs 1990/1991. (See 59 FR 12400, March 16, 1994). Of the 15 vehicle lines with a theft rate higher than 3.5826, 13 are passenger car lines, two are multipurpose passenger vehicle lines, and none are light-duty truck lines.

The MY 2007 theft rate reduction is consistent with the general decreasing trend of theft rates over the past 15 years as indicated by Figure 1. We note, however, that the theft rate from 2003 to 2007 is virtually unchanged (1.84 to 1.85). This suggests that the progress made since 1992 may have reached the limits of current approaches to reducing vehicle thefts, and that some new approaches should be added.

Figure 1: Theft Rate Data Trend (1993-2007)

Theft rate per thousand vehicles produced

The agency believes that the theft rate reduction could be the result of several factors including the increased use of standard antitheft devices (*i.e.*, immobilizers), vehicle parts marking, increased and improved prosecution efforts by law enforcement organizations and increased public awareness measures.

On Wednesday, June 10, 2009, NHTSA published the preliminary theft rates for CY 2007 passenger motor vehicles in the **Federal Register** (74 FR 27493). The agency tentatively ranked each of the MY 2007 vehicle lines in descending order of theft rate. The public was requested to comment on the accuracy of the data and to provide final production figures for individual vehicle lines. The agency used written comments to make the necessary adjustments to its data. As a result of the adjustments, some of the final theft rates and rankings of vehicle lines changed from those published in the June 2009 notice. The agency received written comments from Volkswagen Group of America, Inc. (VW) and Nissan North America, Inc. (Nissan).

In its comments, VW informed the agency that the entries for the Audi RS4,

Audi A8, Audi A4/A4 Quattro/S4/S4 Avant and Audi RS4 were listed with incorrect manufacturer designations. The final theft data has been revised to reflect that Audi is the manufacturer for the Audi RS4, Audi A8, Audi A4/A4 Quattro/S4/S4 Avant and Audi RS4 vehicles.

Additionally, Nissan informed the agency that its Nissan Xterra and Versa vehicle lines were not listed in the agency's June 2009 publication of preliminary data. Upon review, the agency notes that the Nissan Xterra and the Nissan Versa were erroneously omitted from the publication of preliminary theft data and therefore, has corrected the final theft data to reflect the theft rate information for both vehicle lines. As a result of this correction, the Nissan Xterra is ranked No. 69 with a theft rate of 1.6061 and the Nissan Versa is ranked No. 95 with a theft rate of 1.3216.

Reanalysis of the theft rate data revealed that the Pontiac G6 was listed twice with a ranking at No. 13 and No. 66. The correct ranking for the Pontiac G6 is No. 13 with a theft rate of 3.8282. The final theft data has been revised to reflect the correct rank of the Pontiac

G6. Further reanalysis of the theft rate revealed that the Pontiac G5 was also omitted from the theft rate list. The Pontiac G5 has been added to the list. The final theft list has been revised accordingly. As a result of this correction, the Pontiac G5 previously not listed is now ranked No. 66 with a theft rate of 1.6416.

Review of the theft rate data also revealed that the Chrysler Crossfire was not included on the publication of preliminary theft data. NHTSA has corrected the final theft data to include the Chrysler Crossfire. As a result of this correction, the final theft list has been revised accordingly. The Chrysler Crossfire, previously omitted, is now ranked No. 194 with a theft rate of 0.0000.

The following list represents NHTSA's final calculation of theft rates for all 2007 passenger motor vehicle lines. This list is intended to inform the public of calendar year 2007 motor vehicle thefts of model year 2007 vehicles and does not have any effect on the obligations of regulated parties under 49 U.S.C. Chapter 331, Theft Prevention.

FINAL REPORT OF THEFT RATES FOR MODEL YEAR 2007 PASSENGER MOTOR VEHICLES STOLEN IN CALENDAR YEAR 2007
