## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-62743; File No. SR-FICC-2010-05]

### **Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval on a Temporary Basis of Proposed Rule Change To Modify the Rules of the Government Securities Division Regarding the Calculation of Clearing Fund Deposits Relating to Inter-Dealer Broker Positions**

August 19, 2010.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 19b-4 thereunder<sup>2</sup> notice is hereby given that on August 18, 2010, the Fixed Income Clearing Corporation ("FICC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described in Items I and II below, which items have been prepared primarily by FICC.<sup>3</sup> The Commission previously approved the proposal on a temporary basis.<sup>4</sup> The Commission is publishing this notice and order to solicit comments on the proposed rule change from interested parties and to grant accelerated approval through February 18, 2011.

#### **I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The proposed rule change seeks to modify the rules of FICC's Government Securities Division ("GSD") regarding the calculation of clearing fund requirements relating to inter-dealer broker ("IDB") positions.

#### **II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, FICC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> FICC withdrew a substantively identical proposed rule change filed on August 4, 2010, that sought approval without requesting that the approval would be temporary.

<sup>14</sup> 17 CFR 200.30-3(a)(12).

*(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

The GSD maintains a clearing fund comprised of deposits of cash and eligible securities from its members to provide liquidity and to satisfy any losses that might otherwise be incurred as a result of a member's default and the subsequent close-out of its positions. The GSD uses a Value-at-Risk ("VaR") methodology to calculate clearing fund requirements.<sup>5</sup> The clearing fund methodology used by GSD analyzes risk by reference to three factors: (1) End-of-day VaR charge assessing market volatility for observed open positions at end-of-day after giving effect to offsetting positions within the portfolio; (2) "margin requirement differential" ("MRD") to address intraday risk; and (3) "coverage component" ("CC") to adjust the calculation if necessary to reach a given confidence level.<sup>6</sup> The margin calculation is predicated upon an assumption that the open positions of a defaulting member would be liquidated at the end of a three-day period.

IDBs function as intermediaries trading with multiple counterparties, allowing anonymity between trading parties, and providing liquidity for the market. IDBs handle large transactions and operate on small spreads. They perform a critical function in the government securities market in the absence of a centralized trading exchange.

IDBs submit affirmed trades from their systems to the GSD with each trade matched to the counterparty that will ultimately deliver or receive the securities. Although IDBs do not generally hold positions, they may incur positions at the GSD when their counterparties are not GSD members. Because these trades are matched by the IDB to a counterparty prior to submission to the GSD, FICC represents that the risk to FICC in the case of an IDB's default is different from that presented when a dealer member submits a trade that may not have been already matched to a contrasider.

The clearing fund requirement applicable to IDB transactions has increased significantly because of recent market volatility to the point where FICC believes it is disproportionate to the risk that IDB activity presents to the

GSD. Given the importance of IDB transactions in the government securities marketplace, undue and unsustainable margin requirements on GSD IDB activity may be harmful and may introduce systemic risk in the event members are motivated to avoid imposition of disproportionate changes by netting outside of the GSD or by delaying trade submission until later in the day. Accordingly, the GSD adjusted the calculation of the CC charge for IDB transactions in November 2008 and conducted a review of the current margin methodology as applied to IDB activity.

As a result of this review, the GSD proposed and the Commission approved the use of a one-day liquidation assumption when calculating clearing fund requirements applicable to IDB activity.<sup>7</sup> Since IDB trades are matched prior to submission, the GSD believes that the one-day liquidation period as opposed to a three-day liquidation period is a more reasonable assumption in this context. The assumption of a three-day liquidation period will continue to apply to non-IDB activity.

The GSD will continue to monitor the IDB activity of its members and to periodically reassess whether the one-day liquidation period provides adequate coverage. In this regard, FICC will provide the Commission with data to allow the Commission to track the magnitudes and behaviors of the VaR calculations using a one-day liquidation horizon and using a three-day liquidation horizon and with such other information that the Commission may request. FICC further notes its ability under GSD Rule 4 to impose special charges in response to market circumstances or other risk factors with respect to a particular member.

FICC believes that the proposed rule change is consistent with the requirements of Section 17A of the Act<sup>8</sup> and the rules and regulations thereunder because the proposed change will modify the calculation of clearing fund requirements for IDB positions so that the clearing fund requirements is correlated more closely with the level of risk associated with IDB positions.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

FICC does not believe that the proposed rule change will have any impact or impose any burden on competition.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others*

Written comments relating to the proposed rule change have not yet been solicited or received. FICC will notify the Commission of any written comments received by FICC.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder and particularly with the requirements of Section 17A(b)(3)(F).<sup>9</sup> Section 17A(b)(3)(F) requires that the rules of a clearing agency remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions and to assure the safeguarding of securities and funds in the custody or control of the clearing agency or for which it is responsible. The Commission finds that the approval of FICC's rule change on a temporary basis through February 18, 2011 is consistent with this section because by allowing FICC to temporarily modify its rules regarding the calculation of clearing fund requirements for IDB positions to what it believes correlates more closely with the level of risk associated with such positions, FICC will be taking steps toward potentially improving the national clearance and settlement system while still actively monitoring its ability to fulfill its safeguarding obligations.

FICC has requested that the Commission approve the proposed rule prior to the thirtieth day after publication of the notice of the filing. The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the publication of notice because such approval will allow FICC to continue to attempt to correlate IDBs' clearing fund requirements with the level of risk associated with their positions.

The Commission is approving the proposed rule filing on a temporary basis through February 18, 2011, so that FICC will have time to further evaluate the modified calculation of clearing fund requirements for IDB positions and to report its findings and conclusions to the Commission and so that the Commission will have time to evaluate FICC's findings and conclusions before a final determination is made regarding

<sup>5</sup> VaR is defined as the maximum amount of money that may be lost on a given portfolio over a given period of time within a given confidence level.

<sup>6</sup> Under the GSD clearing fund procedures, CC is not calculated with respect to IDB repo transactions. The GSD has recently adjusted the CC charge with respect to certain IDB cash transactions.
