Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

As it relates to any qualifying facility filings, the notices of self-certification [or self-recertification] listed above, do not institute a proceeding regarding qualifying facility status. A notice of self-certification [or self-recertification] simply provides notification that the entity making the filing has determined the facility named in the notice meets the applicable criteria to be a qualifying facility. Intervention and/or protest do not lie in dockets that are qualifying facility self-certifications or self-recertifications. Any person seeking to challenge such qualifying facility status may do so by filing a motion pursuant to 18 CFR 292.207(d)(iii). Intervention and protests may be filed in response to notices of qualifying facility dockets other than self-certifications and self-recertifications.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies

of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

On March 15, 2011, Qualified Hydro 26, LLC (Qualified Hydro), Lock+ Hydro Friends Fund VII (Hydro Friends) and Western Minnesota Municipal Power Agency (WMMPA) filed preliminary permit applications, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of a hydropower project at the U.S. Army Corps of Engineers' (Corps) Mississippi River Lock and Dam #11 structure, located on the Mississippi River near the Township of Dubuque, Dubuque County, Iowa. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owner's express permission.

Qualified Hydro's Mississippi Lock and Dam #11 Project No. 14111 would consist of: (1) A 400-foot-long by 350-foot-wide intake channel; (2) a 600-foot-

long by 350-foot-wide tailrace channel; (3) a new 750-foot-long by 6-foot-diameter buried steel penstock; (4) a new 250-foot by 325-foot concrete powerhouse containing six new turbine-generators and associated switchgear, controls and ancillary systems; the turbine-generator units have individual unit capacities of 3.0 megawatts (MW) and a combined capacity of 18 MW; (5) a new concrete 40-foot by 50-foot control building constructed on the east side of the powerhouse; (6) a 80-foot-long by 60-foot-wide, 20 megavolt-amperes (MVA) substation; (7) a 20,000-foot-long transmission line extending east from the substation to an interconnection point with an existing transmission line on the Illinois side of the river; and (8) appurtenant facilities. The proposed operating voltage would be between 115 and 161 kilovolt (kV). The project would have annual energy production of 90 gigawatt-hours per year (GWh/yr), utilize Corps-designated flows from the Mississippi Lock and Dam #11 structure, and operate as directed by the Corps.

The project would have an average annual generation of 120 GWh/yr, and utilize Corps-designated flows from the Mississippi Lock and Dam #11 structure.

Applicant Contact: Mr. Wayne F. Krouse, Chairman, Hydro Green Energy, LLC, 5090 Richmond Avenue, #390, Houston, TX 77056; (877) 556-6566 x709.

turbine-generator units would have individual unit capacities of 4.6 MW and a combined capacity of 27.6 MW; (4) a new 9.4-mile-long, 69 kV transmission line extending from the switchyard near the proposed powerhouse to an interconnection point with an existing substation on the Wisconsin side of the river; and (5) appurtenant facilities.
