

biological technician, two engineering equipment operators, a forestry technician (fire), a park ranger or environmental education specialist, a shared GIS specialist, and a shared law enforcement officer.

Alternative C (Wetland Restoration Emphasis)

Under this alternative, we would concentrate on improving the lagoon's water quality and habitat; less emphasis would be placed on upland restoration and management and general visitor services. We would provide support for the lagoon's rehabilitation and management. Priority activities (in and adjacent to the wetlands) would include invasive species management (particularly cattail clearing), water quality monitoring and management, water flow management, and creating improved wetland habitat conditions and opportunities.

Additional staff would be required to implement this alternative. Such staff would likely include a biologist, a biological technician, two engineering equipment operators, a forestry technician (fire), a park ranger or environmental education specialist, a shared GIS specialist, and a shared law enforcement officer.
