SUPPLEMENTARY INFORMATION: The

information collected under the requirements of FERC Form No. 73 "Oil Pipelines Service Life Data" (OMB No. 1902–0019) is used by the Commission to implement the statutory provisions of sections 306 and 402 of the Department of Energy Organization Act, 42 U.S.C. 7155 and 7172, and Executive Order No. 12009, 42 FR 46277 (September 13, 1977). The Commission has authority over interstate oil pipelines as stated in the Interstate Commerce Act, 49 U.S.C. 6501 *et al.* As part of the information necessary for the subsequent investigation and review of an oil pipeline company's proposed depreciation rates, the pipeline companies are required to provide

service life data as part of their data submissions if the proposed depreciation rates are based on the remaining physical life calculations. This service life data is submitted on FERC Form No. 73.

The data submitted are used by the Commission to assist in the selection of appropriate service lives and book depreciation rates. Book depreciation rates are used by oil pipeline companies to compute the depreciation portion of their operating expense which is a component of their cost of service which in turn is used to determine the transportation rate to assess customers. FERC staff's recommended book depreciation rates become legally binding when issued by Commission

order. These rates remain in effect until a subsequent review is requested and the outcome indicates that a modification is justified. The Commission implements these filings in 18 CFR parts 347 and 357.

Public Comment and FERC Response

The Commission received one comment from the Bureau of Economic Analysis (BEA). In that comment, BEA strongly supported the continued collection of data through the FERC Form No. 73. Their support stems from reliance on this data collection for key components of its economic statistics. Specifically, BEA uses the information on the service lives for petroleum pipeline companies to validate the lives

in BEA's depreciation rates for petroleum pipelines. Moreover, these rates help BEA derive economic depreciation or consumption of fixed capital as part of the National Income and Product Accounts work BEA does.

In response, the FERC intends to work with BEA should there be a need to make any changes to this data collection.

Action: The Commission is requesting a three-year approval of the collection of data with no changes to the information that is collected on Form 73. This is a mandatory information collection requirement.

Burden Statement: Public reporting burden for this collection is estimated as follows:

Data collection	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
	(1)	(2)	(3)	(1)x(2)x(3)
FERC Form 73	3	1	40	120 hours

The estimated total cost to respondents is \$8,214 [120 hours/2,080 hours¹ per year, times \$142,372² equals \$8,214]. The cost per respondent annually is \$2,738.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather

than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

Dated: May 11, 2011.

Kimberly D. Bose,
Secretary.
