

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**
**National Institutes of Health**
**Center for Scientific Review; Amended Notice of Meeting**

Notice is hereby given of a change in the meeting of the Center for Scientific Review Special Emphasis Panel, June 23, 2011, 8:30 a.m. to June 24, 2011, 5 p.m., West Chicago Lakeshore, 644 North Lake Shore Drive, Chicago, IL, 60611 which was published in the **Federal Register** on May 12, 2011, 76 FR 27652-27653.

The meeting will be one day only June 24, 2011, from 8 a.m. to 5 p.m. The meeting location remains the same. The meeting is closed to the public.

Dated: May 17, 2011.

**DEPARTMENT OF HOMELAND SECURITY**
**U.S. Customs and Border Protection**
**Notice of Issuance of Final Determination Concerning Pocket Projectors**

**AGENCY:** U.S. Customs and Border Protection, Department of Homeland Security.

**ACTION:** Notice of final determination.

**SUMMARY:** This document provides notice that U.S. Customs and Border Protection ("CBP") has issued a final determination concerning the country of origin of pocket projectors. CBP was asked to consider two manufacturing scenarios, under which certain operations would be performed in Taiwan or in China. Based upon the facts presented, CBP has concluded that the manufacturing and testing operations performed in Taiwan do not substantially transform the non-TAA country components. The light engine module and the PCBA main board are the essence of the projectors and it is at their production where the last substantial transformation occurs. Therefore, when the light engine module and PCBA main board module are assembled and programmed in China, the country of origin of the projectors is China for purposes of U.S. government procurement. However, if the light engine module and PCBA main board module are assembled and

programmed in Taiwan, then the country of origin of the projectors is Taiwan for purposes of U.S. government procurement.

**DATES:** The final determination was issued on May 18, 2011. A copy of the final determination is attached. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination on or before June 23, 2011.

**FOR FURTHER INFORMATION CONTACT:** Heather K. Pinnock, Valuation and Special Programs Branch: (202) 325-0034.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that on May 18, 2011, pursuant to subpart B of part 177, U.S. Customs and Border Protection Regulations (19 CFR part 177, subpart B), CBP issued a final determination concerning the country of origin of pocket projectors which may be offered to the U.S. Government under an undesignated government procurement contract. This final determination, HQ H114395, was issued under procedures set forth at 19 CFR part 177, subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511-18). In the final determination, CBP concluded that, based upon the facts presented, the manufacturing and testing operations performed in Taiwan do not substantially transform the non-TAA country components of the projectors. The light engine module and the PCBA main board are the essence of the projector and it is at their production where the last substantial transformation occurs. Therefore, when the light engine module and PCBA main board module are assembled and programmed in China, the country of origin of the projectors is China for purposes of U.S. government procurement. However, if the light engine module and PCBA main board module are assembled and programmed in Taiwan, then the country of origin of the projectors is Taiwan for purposes of U.S. government procurement.

Section 177.29, CBP Regulations (19 CFR 177.29), provides that a notice of final determination shall be published in the **Federal Register** within 60 days of the date the final determination is issued. Section 177.30, CBP Regulations (19 CFR 177.30), provides that any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of a final determination within 30 days of publication of such determination in the **Federal Register**.

Dated: May 18, 2011.

RE: Request for Final Determination on the Country of Origin of Pocket Projectors

Dear Mr. Hall and Mr. Sjoberg:

This is in response to your letter dated July 6, 2010, requesting a final determination on behalf of a U.S. importer, pursuant to subpart B of part 177 of the U.S. Customs and Border Protection (CBP) Regulations (19 C.F.R. Part 177). Under these regulations, which implement Title III of the Trade Agreements Act of 1979 (TAA), as amended (19 U.S.C. § 2511 et seq.), CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purposes of granting waivers of certain "Buy American" restrictions in U.S. law or practice for products offered for sale to the U.S. Government.

This final determination concerns the country of origin of a pocket projector. We note that the U.S. importer is a party-at-interest within the meaning of 19 C.F.R. § 177.22(d)(1) and is entitled to request this final determination. In reaching our decision we have taken in account additional information submitted to this office on September 27, 2010.

**FACTS:**

According to the information submitted, the pocket projector is a 1.97" × 0.59" × 4.06", four ounce, digital light processing (DLP) projector that uses light emitting diodes (LEDs) as its light source to project photos and videos from mobile devices onto any surface. It can produce an image size of up to 60 inches.

The projector is partly comprised of the following components.

Components of Taiwanese origin are:

(1) A digital micromirror device (DMD) (an optical semiconductor; an extremely precise light switch that enables light to be modulated digitally via millions of microscopic mirrors arranged in a rectangular array. Each mirror is spaced less than 1 micron apart);

(2) A Digital Photonic Processor (DPP) 1505 chip that drives the DMD and stores image data;

(3) An Electrically Erasable Programmable Read-Only Memory (EEPROM) chip (PROM 1505 chip);

(4) Light emitting Diodes (LEDs);

(5) Lenses that control light for each designated location;

(6) A printed circuit board assembly integrated circuit (PCBA-IC);
