

Title of Proposal: Section 8 Random Digit Dialing Fair Marketing Rent Surveys.

Description of Information Collection: These surveys provide HUD with a way to estimate Section 8 Fair Market Rents (FMRs) in areas not covered by the American Community Survey annual reports and in areas where FMRs are

believed to be incorrect. The affected public would be those renters random selected to be surveyed and Section 8 voucher holders. The change in this request from what has been approved is to include the use of cell phones, mail surveys and web-based surveys. The burden on the respondent and on those contacted but screened out is to less

than in the previous requests because fewer surveys are being conducted. Minor changes have been made to the survey instrument to make it clearer.

OMB Control Number: 2528-0142.

Agency Form Numbers: None.

Members of Affected Public: Individuals or Households.

	Number of respondents	Annual responses	×	Hours per response	=	Burden hours
Reporting Burden	2,314	1		0.260		602

Status of the proposed information collection: Emergency Collection.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: May 18, 2011.

Colette Pollard,

Departmental Reports Management Officer, Officer of the Chief Information Officer.

INTER-AMERICAN FOUNDATION BOARD

Sunshine Act Meetings

TIME AND DATE: June 6, 2011, 9 a.m.–1:30 p.m.

PLACE: 901 N. Stuart Street, Tenth Floor, Arlington, Virginia 22203.

STATUS: Open session.

MATTERS TO BE CONSIDERED:

- Approval of the Minutes of the March 28, 2011, Meeting of the Board of Directors
- Strategic Plan
- Advisory Council
- Next Meetings

PORTIONS TO BE OPEN TO THE PUBLIC:

- Approval of the Minutes of the March 28, 2011, Meeting of the Board of Directors
- Strategic Plan
- Advisory Council
- Next Meetings

PORTIONS TO BE CLOSED TO THE PUBLIC:

- None

CONTACT PERSON FOR MORE INFORMATION:

Jennifer Hodges Reynolds, (703) 306-0002.

Jennifer Hodges Reynolds,

General Counsel.

BILLING CODE 7025-01-P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management, Regulation and Enforcement

[Docket No. BOEM-2011-0012]

Outer Continental Shelf (OCS) Renewable Energy Program Interim Policy Leasing for Marine Hydrokinetic Technology Testing Offshore Florida

AGENCY: Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE), Interior.

ACTION: Notice of Intent (NOI) to Prepare an Environmental Assessment (EA).

SUMMARY: This notice is being published as an initial step for the purpose of involving Federal agencies, states, tribes, local government, and the public in the leasing decision for an offshore technology testing facility located on the OCS, in accordance with the Department of the Interior and the Council on Environmental Quality (CEQ) regulations implementing the provisions of the National Environmental Policy Act (NEPA) of 1969 as amended (42 U.S.C. 4321 *et seq.*). On November 6, 2007, the Minerals Management Service (MMS), now BOEMRE, announced an interim policy for authorizing the issuance of leases for the installation of offshore data collection and technology testing facilities on the OCS (72 FR 62673). A lease application has been submitted pursuant to the interim policy, initiating the need for an EA.

On June 11, 2010 Florida Atlantic University's (FAU) Southeast National Marine Renewable Energy Center (SNMREC) submitted an application to lease three OCS blocks, approximately nine to 15 nautical miles offshore of Fort Lauderdale, Florida, under its original nomination submitted on November 8, 2007. These three blocks are located on the Atlantic OCS in the Official Protraction Diagram NG 17-06 numbered 7003, 7053, and 7054. The proposed lease area ranges from a depth

of 262 meters (m) in Block 7053 to 366 m in the southern half of Block 7054. This project application was amended on February 10, 2011, and describes data collection and technology testing activities to be conducted on the proposed lease. FAU SNMREC intends to deploy a single-anchor mooring, with a mooring and telemetry buoy (MTB) (similar to the Navy Oceanographic Meteorological Automatic Device (NOMAD) weather buoys) for the purpose of testing, for limited periods, equipment designed to use the Florida current to generate electricity on the proposed leasehold. The proposed MTB would act as both a sensor and measurement platform and mooring point for a platform or vessel which can deploy small-scale ocean current devices. The device(s) to be deployed would be limited to 100-kilowatt (kW) power extraction and seven-meter diameter rotor(s). Initially, it is proposed to deploy an experimental demonstration device with 20 kW maximum power and a three-meter rotor diameter from a vessel moored to the MTB.

BOEMRE intends to prepare an EA for the purpose of considering the environmental consequences associated with issuing an interim policy lease to FAU SNMREC, which will include impacts that may result from the installation of an MTB, deployment of small-scale ocean current devices, and operations of a deployment vessel on the potential leasehold. The EA will consider multiple environmental issues, including impacts to benthic habitats, sea turtles, pelagic fishes, marine mammals, and existing human uses. At a minimum, the alternatives that will be considered are no action (*i.e.*, no issuance of a lease), and the issuance of a lease and approval of certain technology testing activities within the lease area, such as deployment of technology demonstration devices, single anchor moorings, and an MTB.

With this NOI, BOEMRE is requesting comments and input from Federal, state,
