Proposed Project: Safe Harbor for Federally Qualified Health Centers Arrangements-Reinstatement with change—OMB No. 09900322—Office of Inspector General.

Abstract: The Office of the Inspector General (OIG), Office of the Secretary (OS), Department of Health and Human Services (HHS) is requesting a reinstatement without change for the

data collection under the anti-kickback statute, as described below. In order for an arrangement between a health center and a donor individual or entity to enjoy safe harbor protection, the arrangement (1) Must be set out in writing (§ 1001.952(w)(1)(i)(A)); (2) the written agreement must be signed by the parties (§ 1001.952(w)(1)(i)(B)); (3) the written agreement must cover, and specify the amount of, all goods, items, services, donations, or loans provided by the individual or entity to the health center (§ 1001.952(w)(1)(i)(C)); (4) the health center must document its basis for its reasonable expectation that the arrangement will benefit a medically underserved population (§ 1001.952(w)(3)); and (5) the health center, at reasonable intervals, must reevaluate the arrangement to ensure that it is expected to continue to benefit

a medically underserved population, and must document the re-evaluation contemporaneously (§ 1001.952(w)(4)).

OIG may request to see documentation kept pursuant to the safe harbor in order to determine compliance with the terms of the safe harbor and the fraud and abuse laws. Compliance with the safe harbor is voluntary, and no party is ever required to comply with the safe harbor.

The safe harbor does not entail a routine and continuous affirmative collection of data from the regulated community. However, health centers that choose to avail themselves of the safe harbor must have initial documentation and a re-evaluation of the arrangement at least annually. The respondents are businesses and/or other private sector for-profit and not-for-profit institutions.

SUPPLEMENTARY INFORMATION:

Proposed Project

Comparative Effectiveness Research-Continuing Education

Previous dissemination efforts in health care research and evidence through comparative effectiveness funded by the Federal Government have largely been focused in academic settings, rather than among physicians and clinicians in health care delivery settings. This project implements and evaluates methods that extend beyond the academic setting to engage the target audiences in the health care environment where decisions are typically made.

Most clinicians are required to complete continuing medical education (CME) accepted by accrediting organizations recognized by State medical boards. Over sixty boards require anywhere from 12 CME credits to 50 CME credits per year for a clinician to retain their State licensure. (State Medical Licensure Requirements and Statistics, 2010, <http://www.ama-assn.org/amal/pub/upload/mm/40/table16.pdf>.) AHRQ currently provides CME credits on some of its comparative effectiveness research reviews; however, these CME credits are applicable to physicians only and AHRQ is not conducting any follow-up surveys with physicians on these CME activities to ascertain the impact on physician
