SUPPLEMENTARY INFORMATION:

Background

A draft Programmatic Environmental Assessment (PEA) for the deployment and operation of Low Energy X-Ray Inspection Systems (LEXRIS) at CBP operational areas has been completed by the U.S. Customs and Border Protection (CBP), Office of Information and Technology, Laboratories and Scientific Services, Interdiction Technology Branch. The draft PEA is available for public comment.

The purpose of deploying and operating LEXRIS is to non-intrusively scan vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. Use of LEXRIS at U.S. ports of entry, for example, directly supports CBP's mission of securing the U.S. borders and homeland from terrorists and other threats while simultaneously facilitating legitimate trade and travel by assisting CBP personnel in preventing contraband, including illegal drugs and terrorist weapons, from entering the United States.

Two different LEXRIS models are available. One system is mobile, mounted on a truck or van type platform and will be used at CBP operational areas. The system can be driven along side a parked vehicle and will scan the vehicle as it drives by. The driver and passenger(s) will exit the vehicle to be scanned and be escorted outside the controlled area before the vehicle is scanned. The other system is a stationary, portal configuration that will be installed along an existing traffic lane. Vehicles will be scanned as they are driven through the portal. Occupants of the vehicle will have the option of remaining in the vehicle while the driver drives it through the portal or exiting the vehicle and having CBP personnel drive it through the portal. Examples of CBP operational areas include, but are not limited to, ports of entry, CBP checkpoints, and locations of events designated as national special security events.

LEXRIS is needed to fill a unique capability to detect objects that are not effectively visualized by other non-intrusive inspection technologies currently used by CBP. LEXRIS gives a clear image of objects in the vehicle, including objects that may be hidden in fenders, tires, trunks, gas tanks, and under hoods. LEXRIS provides CBP personnel with information about what may be encountered during a manual search and, in some cases, will

eliminate the need for CBP personnel to manually enter vehicles to search for contraband. As a result, LEXRIS will increase the safety of CBP personnel.

The draft PEA addresses the potential impacts from the installation and operation of LEXRIS at various CBP operational areas throughout the United States for the purpose of conducting non-intrusive inspections. Evaluations were conducted on various resources present at operational areas, including: climate, soils, water quality, air quality, vegetation, wildlife, noise, infrastructure, aesthetics, and radiological health and safety.

Next Steps

This process is being conducted pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality Regulations for Implementing the NEPA (40 CFR parts 1500–1508), and Department of Homeland Security Directive 023–01, *Environmental Planning Program*, (April 19, 2006).

Substantive comments concerning environmental impacts received from the public and agencies during the comment period will be evaluated to determine whether further environmental impact review is needed in order to complete the Final PEA. The Final PEA will be made available to the public through a Notice of Availability in the **Federal Register**.

Should CBP determine, after review of the comments, that the implementation of the proposed action would not have a significant impact on the environment, it will prepare a Finding of No Significant Impact (FONSI), and a Notice of Availability of the FONSI for publication in the **Federal Register**.

Should CBP determine that significant environmental impacts exist due to the action, CBP will prepare a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for publication in the **Federal Register**.
